EDITORIAL BOARD

Chairman

Dr R. M. Miller, Director, Knowledge Management and Sustainability, Uniqema, 30 Queen Anne's Gate, London, UK SW1H 9AB

R. Cornelis, Gent, Belgium
S. J. Haswell, Hull, UK
R. T. Kennedy, FL, USA

B. L. Sharp, Loughborough, UK
Y. Thomassen, Oslo, Norway
A. E. Underhill, Bangor, UK

ASSOCIATE SCIENTIFIC EDITORS

All ASEs are also members of the Editorial Board. Potential contributors wishing to discuss the scientific content of their paper(s) may contact appropriate members of this group.

Chief Associate Scientific Editor

Professor Malcolm R. Smyth, Department of Chemical Sciences, Dublin City University, Eire
E-mail smyth@ccmail.dcu.ie

Professor Michael Thompson
Department of Chemistry
University of Toronto, Canada
E-mail mikethom@alchemy.chem.utoronto.ca

Dr C. L. Paul Thomas
Department of Instrumentation and Analytical Science,
UMIST, UK
E-mail paul.thomas@umist.ac.uk

INTERNATIONAL ADVISORY BOARD

N. W. Barnett, Victoria, Australia
K. D. Bartle, Leeds, UK
A. M. Bond, Victoria, Australia
R. G. Brereton, Bristol, UK
U. A. Th. Brinkman, Amsterdam, The Netherlands
A. C. Calokerinos, Athens, Greece
D. Diamond, Dublin, Eire
L. Ebdon, Plymouth, UK
H. Emons, Juelich, Germany
J. P. Foley, Philadelphia, PA, USA
M. F. Giné, Sao Paulo, Brazil
L. Gorton, Lund, Sweden
K. Jinno, Toyohashi, Japan

L. Kolomiets, Moscow, Russia
H. K. Lee, Kent Ridge, Singapore
S. Lunte, Lawrence, KS, USA
F. Palmisano, Bari, Italy
J. Pawliszyn, Ontario, Canada
T. B. Pierce, Didcot, UK
J. Růžicka, Seattle, WA, USA
K. Štulík, Prague, Czech Republic
K. C. Thompson, Rotherham, UK
M. Thompson, Toronto, Canada
M. Valcárcel, Cordoba, Spain
J. Wang, Las Cruces, NM, USA
I. D. Wilson, Macclesfield, UK

EDITORIAL STAFF

Managing editor

Sarah J. R. Williams

US editor

Robert T. Kennedy

Assistant Editor

Yvonne G. Lawson

Editorial secretary

Linda Warncke

Editorial production manager

Caroline J. Seeley

Deputy editor (production)

Ziva E. Whitelock

Technical editors

Tanya Smekal
Roger A. Young

Secretary

Lesley Turney

INFORMATION FOR AUTHORS

Full details of how to submit material for publication in *The Analyst* are given in the Instructions to Authors in the January issue and are available on the web at <http://www.rsc.org/analyst>. Separate copies are available on request. There is no page charge. Fifty reprints are supplied free of charge. Authors may reproduce/republish portions of their published contribution without seeking permission from the RSC, provided that any such republication is accompanied by an acknowledgement in the form: (Original Citation)—Reproduced by permission of The Royal Society of Chemistry. Manuscripts (three copies typed in double spacing) should be addressed to:

S. J. R. Williams, Managing Editor,
The Royal Society of Chemistry,
Thomas Graham House, Science Park, Milton Road, Cambridge,
UK CB4 0WF

SUBJECT INDEX, 1999

ACETALDEHYDE

Amperometric detection of gaseous ethanol and acetaldehyde at low concentrations on an Au-Nafion electrode, 871

ACETONE

Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143

ACIDITY

An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727

ACOUSTIC WAVES

Acoustic waves and the study of biochemical macromolecules and cells at the sensor-liquid interface, 1405

ACTINIDES

Automated extraction chromatographic separations of actinides using separation-optimized sequential injection techniques, 1143

ADDITIVES

A rapid ultrasonic extraction technique to identify and quantify additives in poly(ethylene), 797

ADENINE

Simultaneous determination of guanine and adenine contents in DNA, RNA and synthetic oligonucleotides using a chemically modified electrode, 679

ADSORPTION

Adsorptive and electrochemical behaviors of estradiol valerate at a mercury electrode, 1651

ADSORPTIVE VOLTAMMETRY

Flow probe for *in situ* electrochemical monitoring of trace chromium, 349

AGAROSE

Immobilisation of thiabendazole specific antibodies on an agarose matrix for application in immunoaffinity chromatography, 87

AIR

An impregnated filter sampling approach for determination of hydrogen cyanide in air by a kinetic-fluorimetric micellar method, 615

Sampling of diisocyanates (HDI, TDI) in air by derivatisation with secondary amines as reagents. Part 1. Partial rate factors (PRF) of reagents, 933

Laser photoacoustic spectrometry and its application for simulation of air pollution in a wind tunnel, 1205

HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291

Determination of methyl isocyanate in air by fluorimetry, 1327

Spectrophotometric determination of lead with *N*-hydroxy-*N,N'*-diphenylbenzamide and diphenylcarbazone in airborne dust particulates and soil, 1331

Computer simulation of active air sampling for volatile organic compound analysis, 1395

Determination of active chlorine in air by bonded phase sorbent collection and spectrophotometric analysis, 1853

ALDEHYDES

HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291

ALKALI METAL IONS

Perfluorocarboxylic acid counter ion enhanced extraction of aqueous alkali metal ions with supercritical carbon dioxide, 1507

ALKOXYLANES

Gas chromatographic determination of some alkoxy silanes for use in occupational exposure assessment, 665

ALKYLBENZENES

Determination of equilibrium constant of alkylbenzenes binding to bovine serum albumin by solid phase microextraction, 1443

ALLOYS

Synthesis of 2-hydroxy-3-carboxyl-5-sulfonarsenazo and its application to the spectrophotometric determination of thorium, 1839

ALUMINIUM

Infrared emission study of the thermal transformation mechanism of Al_2O_3 -pillared clay, 381

Determination of aluminium in beverages by automated non-segmented continuous flow analysis with fluorescent detection of the lumogallion complex, 793

Selectivity enhancement in spectrophotometry: on-line interference suppression using polyurethane foam minicolumn for aluminium determination with Methyl Thymol Blue, 805

Determination of bismuth in aluminium and in steels by electrothermal atomic absorption spectrometry after on-line separation using a minicolumn of activated carbon, 1249

AMBERLITE XAD-2

Amberlite XAD-2 functionalized with chromotropic acid: synthesis of a

new polymer matrix and its applications in metal ion enrichment for their determination by flame atomic absorption spectrometry, 1847

AMINES

Fluorescence properties of carbazole-9-ylpropionic acid and its application to the determination of amines via HPLC with fluorescence detection, 281

Calixarene-coated piezoelectric quartz crystal sensor for the detection of organic amine in liquids, 1787

AMINO ACID

Comparison of four fluorescence Edman reagents with benzofurazan structure for the detection of thiazolinone amino acid derivatives, 43

Determination of tryptophan in feed samples by cyclic voltammetry and multivariate calibration methods, 733

Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865

Characterization and application of acridine-9-*N*-acetyl-*N*-hydroxysuccinimide as a pre-column derivatization agent for fluorimetric detection of amino acids in liquid chromatography, 1755

AMINOGLYCOSIDES

Immunochemical detection of aminoglycosides in milk and kidney, 301

AMINOHIPPURIC ACID

Simultaneous determination of inulin and *p*-aminohippuric acid (PAH) in human plasma and urine by high-performance liquid chromatography, 833

AMMONIUM ION

Ammonium hydroxide pre-treatment as an aid to increasing extraction efficiencies of toxic metals from spent oxide waste, 1513

AMPEROMETRY

Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143

Increasing the sensitivity of *Listeria monocytogenes* assays: evaluation using ELISA and amperometric detection, 295

Three approaches to the development of selective bilayer amperometric biosensors for glucose by *in situ* electropolymerization, 319

Development of a cellobiose dehydrogenase modified electrode for amperometric detection of diphenols, 527

Self-gelatinizable graft copolymer of poly(vinyl alcohol) with 4-vinylpyridine as an immobilization matrix for the construction of a tyrosinase-based amperometric biosensor, 699

Amperometric detection of gaseous ethanol and acetaldehyde at low concentrations on an Au-Nafion electrode, 871

Simplified amperometric detector for capillary electrophoresis, 1035

Amperometric end-point detection of complexometric titrations with platinum microelectrodes, 1059

Evaluation of the 'antioxidant power' of olive oils based on a FIA system with amperometric detection, 1115

Experimental demonstration and simulation of electrochemical non-linear responses to glucose and its interferents with an amperometric sensor, 1175

Total cyanide determination by a segmented flow injection-on-line UV digestion-amperometric method, 1255

On-line deoxygenation in reductive (and oxidative) amperometric detection: environmental applications in the liquid chromatography of organic peroxides, 1811

AMPHETAMINES

Automated trace enrichment for screening and/or determination of primary, secondary and tertiary amphetamines in biological samples by liquid chromatography, 239

ANILINE

A comparison of chemometric methods for the flow injection simultaneous spectrophotometric determination of aniline and cyclohexylamine, 745

ANION

Ion chromatographic separation of common mono- and divalent cations on an unmodified silica gel column by elution with oxalic acid containing crown ethers, 505

ANODIC-STRIPPING VOLTAMMETRY

Anodic stripping voltammetry of copper at insonated glassy carbon-based electrodes: application to the determination of copper in beer, 1053

ANTIBIOTICS

Immunochemical detection of aminoglycosides in milk and kidney, 301

ANTIBODIES

Immobilisation of thiabendazole specific antibodies on an agarose matrix for application in immunoaffinity chromatography, 87

ANTIMONY

Development and evaluation of an analytical procedure for the determination of antimony in plant materials by hydride generation atomic absorption spectrometry, 777

Optimized procedure for the determination of antimony in lipid-rich environmental matrices by flow injection hydride generation atomic absorption spectrometry, 923

Determination of low concentrations of potentially toxic elements in human liver from newborns and infants, 1337

ANTIOXIDANT

Evaluation of the 'antioxidant power' of olive oils based on a FIA system with amperometric detection, 1115

ARSENIC

Membrane solubilization with tetramethylammonium hydroxide for the preconcentration and electrothermal atomic absorption spectrometric determination of trace amounts of arsenic in water, 23

Optimization of the solubilization, extraction and determination of inorganic arsenic [As(III) + As(V)] in seafood products by acid digestion, solvent extraction and hydride generation atomic absorption spectrometry, 601

Separation of microgram quantities of As(V), As(III) and organoarsenic species in aqueous solutions and determination by energy dispersive X-ray fluorescence spectrometry, 1105

ARTIFICIAL NEURAL NETWORKS

Artificial neural network approach to the evaluation of the coordination geometry in organotin(IV) compounds, 721

Avoiding overfitting in the analysis of high-dimensional data with artificial neural networks (ANNs), 1675

ATMOSPHERIC GASES

Development of an automated, simultaneous and continuous measurement system by using a diffusion scrubber coupled to ion chromatography for monitoring trace acidic and basic gases (HCl, HNO₃, SO₂ and NH₃) in the atmosphere, 1151

ATMOSPHERIC PRESSURE CHEMICAL IONIZATION

The analysis of β -agonists by packed-column, 827

ATMOSPHERIC PRESSURE IONIZATION

Rapid screening of banknotes for the presence of controlled substances by thermal desorption atmospheric pressure chemical ionisation tandem mass spectrometry, 103

ATOMIC ABSORPTION SPECTROMETRY

Membrane solubilization with tetramethylammonium hydroxide for the preconcentration and electrothermal atomic absorption spectrometric determination of trace amounts of arsenic in water, 23

Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191

The use of emulsions for the determination of methylmercury and inorganic mercury in fish-eggs oil by cold vapor generation in a flow injection system with atomic absorption spectrometric detection, 593

Optimization of the solubilization, extraction and determination of inorganic arsenic [As(III) + As(V)] in seafood products by acid digestion, solvent extraction and hydride generation atomic absorption spectrometry, 601

Development and evaluation of an analytical procedure for the determination of antimony in plant materials by hydride generation atomic absorption spectrometry, 777

Optimized procedure for the determination of antimony in lipid-rich environmental matrices by flow injection hydride generation atomic absorption spectrometry, 923

Determination of methylmercury and inorganic mercury in whole blood by headspace, cryofocusing gas chromatography and atomic absorption spectrometry, 1493

Alkaline solubilization of biological materials for trace element analysis by electrothermal atomic absorption spectrometry, 1843

ATOMIC EMISSION SPECTROMETRY

Determination of methylcyclopentadienylmanganese tricarbonyl (MMT) in aqueous samples by SPME-GC-AED, 71

Identification of non-target compounds using gas chromatography with simultaneous atomic emission and mass spectrometric detection (GC-AED/MS): analysis of municipal wastewater, 1547

ATOMIC FLUORESCENCE SPECTROMETRY

Determination of total mercury in hydrocarbons and natural gas condensate by atomic fluorescence spectrometry, 185

ATRAZINE

Conductimetric sensor for atrazine detection based on molecularly imprinted polymer membranes, 331

AUTOMATION

Rapid automated spectrophotometric competitive complexation studies of drugs with cyclodextrins using the flow injection gradient technique: tricyclic antidepressant drugs with α -cyclodextrin, 391

Automated extraction chromatographic separations of actinides using separation-optimized sequential injection techniques, 1143

Ultrasonic extraction of hexavalent chromium in solid samples followed by automated analysis using a combination of supported liquid membrane extraction and UV detection in a flow system, 1367

An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727

BACTERIA

Increasing the sensitivity of *Listeria monocytogenes* assays: evaluation using ELISA and amperometric detection, 295

Dipicolinic acid (DPA) assay revisited and appraised for spore detection, 1599

BEER

Anodic stripping voltammetry of copper at insonated glassy carbon-based electrodes: application to the determination of copper in beer, 1053

BENZOIC ACID

Simultaneous determination of benzoic acid and saccharin in soft drinks by using lanthanide-sensitized luminescence, 1079

BEVERAGES

Determination of aluminum in beverages by automated non-segmented continuous flow analysis with fluorescent detection of the lumogallion complex, 793

The detection of caffeine in a variety of beverages using Curie-point pyrolysis mass spectrometry and genetic programming, 1069

BINARY SOLVENT MIXTURES

The effect of temperature and the composition of non-associating binary solvent mixtures on solute selectivity in liquid chromatography, 1745

BIOASSAY

Bioassays for the detection of growth-promoting agents, veterinary drugs and environmental contaminants in food, 79

BIOAVAILABILITY

Measurement of amorphous ferric phosphate to assess iron bioavailability in diets and diet ingredients, 425

BIOLOGICAL

On-line dialysis-SPE-CE of acidic drugs in biological samples, 115

Fundamental investigations on the near-infrared spectra of microbial biomass as applicable to bioprocess monitoring, 157

Determination of copper and zinc in blood plasma by ion chromatography using a cobalt internal standard, 245

Studies of organic residues from ancient Egyptian mummies using high temperature-gas chromatography-mass spectrometry and sequential thermal desorption-gas chromatography-mass spectrometry and pyrolysis-gas chromatography-mass spectrometry, 443

High density oligonucleotide and DNA probe arrays for the analysis of target DNA, 1133

Acoustic waves and the study of biochemical macromolecules and cells at the sensor-liquid interface, 1405

Quantitative FT-Raman spectroscopy to measure wood cell dimensions, 1477

Pruning neural network for architecture optimization applied to near-infrared reflectance spectroscopic measurements. Determination of the nitrogen content in wheat leaves, 1669

Study of a molecular imprinting polymer coated BAW bio-mimic sensor and its application to the determination of caffeine in human serum and urine, 1781

BIOLOGICAL MATERIALS

Rapid preconcentration method for the determination of azadirachtin-A and -B, nimbin and salannin in neem oil samples by using graphitised carbon solid phase extraction, 19

Automated trace enrichment for screening and/or determination of primary, secondary and tertiary amphetamines in biological samples by liquid chromatography, 239

Accuracy in naturally occurring anabolic steroid assays in cattle and first approach to quality control in Italy, 307

Reactivity of an immobilized anti-progesterone antiserum with homologous and heterologous progesterone-horse radish peroxidase conjugates, 313

HPLC with fluorescence detection of methamphetamine and amphetamine in segmentally analyzed human hair, 493

A new and rapid method for the determination of nicarbazin residues in poultry feed, eggs and muscle tissue using supercritical fluid extraction and high performance liquid chromatography, 499

Novel calibration with correction for drift and non-linear response for continuous flow isotope ratio mass spectrometry applied to the determination of $\delta^{15}\text{N}$, total nitrogen, $\delta^{13}\text{C}$ and total carbon in biological material, 571

Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865

GC-MS determination of steroids related to androgen biosynthesis in human hair with pentafluorophenyl dimethylsilyl-trimethylsilyl derivatisation, 1297

Determination of low concentrations of potentially toxic elements in human liver from newborns and infants, 1337

Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345

Supercritical fluid extraction (SFE) as a multi-residue extraction procedure for β -agonists in bovine liver tissue, 1355

Determination of carphedon in human urine by solid-phase microextraction using capillary gas chromatography with nitrogen-phosphorus detection, 1559

Production and characterization of polyclonal antibodies to sulfamethazine and their potential use in immunoaffinity chromatography for urine sample pre-treatment, 1569

Automated stand-alone flow injection immunoanalysis system for the determination of cephalixin in milk, 1605

Production of monoclonal antibody and development of enzyme-linked immunosorbent assay for kanamycin in biological matrices, 1611

Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749

Sensitive gas chromatographic-mass spectrometric method for the

- determination of gacyclidine in rat plasma and spinal cord dialyzates, 1761
- Alkaline solubilization of biological materials for trace element analysis by electrothermal atomic absorption spectrometry, 1843
- BIOSENSOR**
- Optical biosensing of nitric oxide using the metalloprotein cytochrome *c'*, 129
- Three approaches to the development of selective bilayer amperometric biosensors for glucose by *in situ* electropolymerization, 319
- Rapid determination of lactulose in milk by microdialysis and biosensors, 325
- Development of a cellobiose dehydrogenase modified electrode for amperometric detection of diphenols, 527
- Development of chemiluminescent biosensing of nucleic acids based on oligonucleotide-immobilized gold surfaces, 533
- Self-gelatinizable graft copolymer of poly(vinyl alcohol) with 4-vinylpyridine as an immobilization matrix for the construction of a tyrosinase-based amperometric biosensor, 699
- Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865
- Modified gas-permeable silicone rubber membranes for covalent immobilisation of enzymes and their use in biosensor development, 1181
- Evaluation of an immunobiosensor for the on-site testing of veterinary drug residues at an abattoir. Screening for sulfamethazine in pigs, 1315
- Acoustic waves and the study of biochemical macromolecules and cells at the sensor-liquid interface, 1405
- A sulfite biosensor fabricated using electrodeposited polytyramine: application to wine analysis, 1775
- BISMUTH**
- Determination of bismuth in aluminium and in steels by electrothermal atomic absorption spectrometry after on-line separation using a minicolumn of activated carbon, 1249
- BISPHENOL A**
- Trace determination of phenol, bisphenol A and bisphenol A diglycidyl ether in mixtures by excitation fluorescence following micro liquid-liquid extraction using partial least squares regression, 385
- BLOOD**
- Determination of copper and zinc in blood plasma by ion chromatography using a cobalt internal standard, 245
- Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657
- Determination of methylmercury and inorganic mercury in whole blood by headspace, cryofocusing gas chromatography and atomic absorption spectrometry, 1493
- Novel chloride-selective optode based on polymer-stabilised emulsions doped with a lipophilic fluorescent polarity-sensitive dye, 1617
- BOVINE SERUM ALBUMIN**
- Determination of equilibrium constant of alkylbenzenes binding to bovine serum albumin by solid phase microextraction, 1443
- BUTTER**
- Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143
- CADMIUM**
- Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345
- Determination of ultra-trace amounts of cadmium, cobalt and nickel in sea-water by electrothermal atomic absorption spectrometry with on-line preconcentration, 1695
- CAFFEINE**
- The detection of caffeine in a variety of beverages using Curie-point pyrolysis mass spectrometry and genetic programming, 1069
- Study of a molecular imprinting polymer coated BAW bio-mimic sensor and its application to the determination of caffeine in human serum and urine, 1781
- CALIBRATION**
- Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophosphorimetry, 49
- Novel calibration with correction for drift and non-linear response for continuous flow isotope ratio mass spectrometry applied to the determination of $\delta^{15}\text{N}$, total nitrogen, $\delta^{13}\text{C}$ and total carbon in biological material, 571
- Linear calibration function of luminescence quenching-based optical sensor for trace oxygen analysis, 695
- A program for the weighted linear least-squares regression of unbalanced response arrays, 1191
- An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727
- CAPILLARY ELECTROPHORESIS**
- Direct chiral resolution of aliphatic α -hydroxy acids using 2-hydroxypropyl- β -cyclodextrin in capillary electrophoresis, 55
- Universal detection in capillary electrophoresis with a micro-interferometric backscatter detector, 221
- A model of thermally generated pH gradients in tapered capillaries, 335
- Simplified amperometric detector for capillary electrophoresis, 1035
- Development of near-infrared fluorophoric labels for the determination of fatty acids separated by capillary electrophoresis with diode laser induced fluorescence detection, 1541
- CAPILLARY GAS CHROMATOGRAPHY**
- Determination of carphedon in human urine by solid-phase microextraction using capillary gas chromatography with nitrogen-phosphorus detection, 1559
- CAPILLARY LIQUID CHROMATOGRAPHY**
- Aspects and applications of non-aqueous high temperature packed capillary liquid chromatography, 1137
- CAPILLARY ZONE ELECTROPHORESIS**
- Simultaneous determination of *cis*- and *trans*-resveratrol in wines by capillary zone electrophoresis, 61
- Determination of hexamethylene diisocyanate-based isocyanates in spray-painting operations. Part 2. Comparison of high performance liquid chromatography with capillary zone electrophoresis, 119
- CARBARYL**
- Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophosphorimetry, 49
- CARBON-13 NMR**
- Determination of phenol in phenol tars from the cumene-to-phenol process streams with ^{13}C -NMR spectroscopy, 1823
- CARBON MOLECULAR SIEVE**
- Adsorption of water vapour in the solid sorbents used for the sampling of volatile organic compounds, 1553
- CARBON PASTE ELECTRODE**
- Screen-printed zeolite-modified carbon electrodes, 1185
- CARBONYLS**
- HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291
- CARBOPACK B**
- Evaluation of Carbowax B adsorbent for the tube-type diffusive sampling of volatile organic compounds at ambient concentration, 1859
- CARBOXYLIC ACID**
- A new fluorogenic reagent for carboxylic acids, 7-acetylamin-4-mercapto-2,1,3-benzoxadiazole (AABD-SH), derived from an empirical method for predicting fluorescence characteristics, 1689
- CARPHEDON**
- Determination of carphedon in human urine by solid-phase microextraction using capillary gas chromatography with nitrogen-phosphorus detection, 1559
- CATALYSIS**
- Highly sensitive spectrofluorimetric determination of hydrogen peroxide with β -cyclodextrin-hemin as catalyst, 173
- CATECHOLAMINES**
- Simplified amperometric detector for capillary electrophoresis, 1035
- CATHODIC-STRIPPING VOLTAMMETRY**
- Cathodic stripping voltammetric determination of ultratrace gold(III) at a bulk modified epoxy-graphite tube composite electrode in flow systems, 353
- Sono-cathodic stripping voltammetry of manganese at a polished boron-doped diamond electrode: application to the determination of manganese in instant tea, 1791
- CATION**
- Ion chromatographic separation of common mono- and divalent cations on an unmodified silica gel column by elution with oxalic acid containing crown ethers, 505
- CELLULOSE**
- Measurement of the cumulative particle size distribution of microcrystalline cellulose using near infrared reflectance spectroscopy, 33
- CEPHALEXIN**
- Automated stand-alone flow injection immunoanalysis system for the determination of cephalexin in milk, 1605
- CERTIFIED REFERENCE MATERIALS**
- Measurement uncertainty: Approaches to the evaluation of uncertainties associated with recovery, 981
- CHELATING AGENT**
- Construction and evaluation of ion selective electrodes for perchlorate with a summing operational amplifier: application to pyrotechnics mixtures analysis, 97
- CHELATING RESIN**
- Liquid chromatographic selectivity and retention behavior of rare-earth elements on a chelating resin having a propylenediaminetetraacetate type functional group, 1595
- CHELATION**
- Extraction and recovery of metals using a supercritical fluid with chelating agents, 609
- CHEMICAL IONIZATION**
- Rapid screening of banknotes for the presence of controlled substances by thermal desorption atmospheric pressure chemical ionisation tandem mass spectrometry, 103
- Separation and characterisation of phenol-formaldehyde (resol)

- prepolymers using packed-column supercritical fluid chromatography with APC1 mass spectrometric detection, 993
- CHEMICAL OXYGEN DEMAND**
Flow injection determination of chemical oxygen demand in leaching liquid, 1251
- CHEMILUMINESCENCE**
Flow injection determination of vitamin K₁ by a photoinduced chemiluminescent reaction, 197
Flow injection analysis-direct chemiluminescence determination of ergonovine maleate enhanced by hexadecylpyridinium chloride, 413
Development of chemiluminescent biosensing of nucleic acids based on oligonucleotide-immobilized gold surfaces, 533
Analysis of tricyclic antidepressants using electrogenerated chemiluminescence, 759
Flow-injection chemiluminescence determination of isoniazid using on-line electrogenerated BrO⁻ as an oxidant, 763
Flow injection determination of lactate based on a photochemical reaction using photometric and chemiluminescence detection, 1517
- CHEMOMETRICS**
Procrustes analysis for the comparison of test methods in reversed-phase high performance liquid chromatography of basic compounds, 227
A top-down in-house validation based approach for the investigation of the measurement uncertainty using fractional factorial experiments, 537
Typification of vinegars from Jerez and Rioja using classical chemometric techniques and neural network methods, 547
Novel calibration with correction for drift and non-linear response for continuous flow isotope ratio mass spectrometry applied to the determination of $\delta^{15}\text{N}$, total nitrogen, $\delta^{13}\text{C}$ and total carbon in biological material, 571
Deconvolution of partially overlapping tailing peaks in diode array high performance liquid chromatography using purity ratios, 705
Optimum operating conditions for chiral separations in liquid chromatography, 713
Wavelength selection by net analyte signals calculated with multivariate factor-based hybrid linear analysis (HLA). A theoretical and experimental comparison with partial least-squares (PLS), 725
Electroanalytical signal processing method based on B-spline wavelets analysis, 739
Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971
A natural history of analytical methods, 991
Multivariate standardization techniques on ion-selective sensor arrays, 1045
Evolving window orthogonal projections method for two-way data resolution, 1471
Avoiding overfitting in the analysis of high-dimensional data with artificial neural networks (ANNs), 1675
Experimental design and multivariate calibration in the development, set-up and validation of a differential pulse polarographic and UV spectrophotometric method for the simultaneous plasmatic determination of the therapeutic metronidazole-pefloxacacin combination, 1683
Integrated processing of triply coupled diode array liquid chromatography electrospray mass spectrometric signals by chemometric methods, 1733
Monitoring of the acid catalysed esterification of ethanol by acetic acid using Raman spectroscopy, 1817
- CHIRAL SEPARATION**
Direct chiral resolution of aliphatic α -hydroxy acids using 2-hydroxypropyl- β -cyclodextrin in capillary electrophoresis, 55
- CHLORATE**
The use of nitrite ion in the chromatographic determination of large amounts of hypochlorite ion and of traces of chlorite and chlorate ions, 1439
- CHLORIDE**
Novel chloride-selective optode based on polymer-stabilised emulsions doped with a lipophilic fluorescent polarity-sensitive dye, 1617
Voltammetric determination of trace mercury in concentrated chloride media using polymer-film electrodes modified with polyammonium macrocyclic receptors, 1661
- CHLORINE**
The measurement of ^{36}Cl and ^{129}I in concrete wastes, 627
Determination of active chlorine in air by bonded phase sorbent collection and spectrophotometric analysis, 1853
- CHLORITE**
The use of nitrite ion in the chromatographic determination of large amounts of hypochlorite ion and of traces of chlorite and chlorate ions, 1439
- CHLOROPHYLL**
Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971
- CHROMATOGRAPHY**
Determination of polyaromatic hydrocarbons and some related compounds in industrial waste oils by GPC-HPLC-UV, 67
Rapid separation of uranium and plutonium by extraction chromatography for determination by thermal ionisation mass spectrometry, 263
Determination of uranium and thorium in geological materials using extraction chromatography, 271
Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971
Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159
Utilization of a scientifically operated charge-coupled device detector for high-performance thin-layer chromatographic analysis of tetracyclines, 1577
- CHROMIUM**
Classical wet ashing *versus* microwave-assisted attacks for the determination of chromium in plants, 1
Flow probe for *in situ* electrochemical monitoring of trace chromium, 349
Chromium(III)-selective electrode based on a macrocyclic compound, 521
Flow analysis of micro amounts of chromium(III) and (VI) in natural water by solid phase spectrophotometry using diphenylcarbazide, 787
Ultrasonic extraction of hexavalent chromium in solid samples followed by automated analysis using a combination of supported liquid membrane extraction and UV detection in a flow system, 1367
- CHROMOTROPIC ACID**
Amberlite XAD-2 functionalized with chromotropic acid: synthesis of a new polymer matrix and its applications in metal ion enrichment for their determination by flame atomic absorption spectrometry, 1847
- CHRONOPOTENTIOMETRY**
Wavelet frequency spectrum analysis of oscillograms, 893
- CIRCULAR DICHROISM**
Multi-beam circular dichroism detector for HPLC, 483
- CLAY**
Determination of live clay in foundry greensand by sodium-selective electrode, 135
- CLINICAL**
Synthesis of meso-tetra-(3,5-dibromo-4-hydroxyphenyl)- porphyrin and its application to second-derivative spectrophotometric determination of lead in clinical samples, 1227
Determination of methylmercury and inorganic mercury in whole blood by headspace, cryofocusing gas chromatography and atomic absorption spectrometry, 1493
- COAL**
Determination of 17 trace elements in coal and ash reference materials by ICP-MS applied to milligram sample sizes, 177
- COBALT**
Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191
Determination of ultra-trace amounts of cadmium, cobalt and nickel in sea-water by electrothermal atomic absorption spectrometry with on-line preconcentration, 1695
- COMPLEXATION**
A study of L-cysteine adsorption on gold *via* electrochemical desorption and copper(II) ion complexation, 1645
Complexation study of diclofenac with β -cyclodextrin and spectrofluorimetric determination, 1833
- COMPLEXOMETRY**
Amperometric end-point detection of complexometric titrations with platinum microelectrodes, 1059
- COMPUTER SIMULATION**
Computer simulation of active air sampling for volatile organic compound analysis, 1395
- CONDUCTING POLYMER**
Heterogeneous redox catalysis at conducting polymer ultramicroelectrodes, 1635
- CONTINUOUS-FLOW ANALYSIS**
Determination of aluminum in beverages by automated non-segmented continuous flow analysis with fluorescent detection of the lumogallion complex, 793
- COORDINATION GEOMETRY**
Artificial neural network approach to the evaluation of the coordination geometry in organotin(IV) compounds, 721
- COPPER**
Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657
Anodic stripping voltammetry of copper at insonated glassy carbon-based electrodes: application to the determination of copper in beer, 1053
Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345
Sorption-catalytic testing of copper on a paper-based sorbent with attached alkylamino groups, 1523
- COPPER CHELATES**
Cu(II)-amino acid and Cu(II)-peptide chelates in animal feeding: a

semi-quantitative approach to characterize the commercial products and the limits of their structural integrity, 837

CORTICOSTEROIDS

Determination of dexamethasone in feed by TLC and HPLC, 1583

CRYSTAL VIOLET

Evaluation of Nafion-Crystal Violet films for the construction of an optical relative humidity sensor, 1623

CYANIDE

An impregnated filter sampling approach for determination of hydrogen cyanide in air by a kinetic-fluorimetric micellar method, 615

Total cyanide determination by a segmented flow injection-on-line UV digestion-ampereometric method, 1255

CYCLIC VOLTAMMETRY

Determination of tryptophan in feed samples by cyclic voltammetry and multivariate calibration methods, 733

CYCLODEXTRIN

Direct chiral resolution of aliphatic α -hydroxy acids using 2-hydroxypropyl- β -cyclodextrin in capillary electrophoresis, 55

Rapid automated spectrophotometric competitive complexation studies of drugs with cyclodextrins using the flow injection gradient technique: tricyclic antidepressant drugs with α -cyclodextrin, 391

Enhanced microdialysis recovery of some tricyclic antidepressants and structurally related drugs by cyclodextrin-mediated transport, 1027

CYCLOHEXYLAMINE

A comparison of chemometric methods for the flow injection simultaneous spectrophotometric determination of aniline and cyclohexylamine, 745

DATA ANALYSIS

Evolving window orthogonal projections method for two-way data resolution, 1471

DECONVOLUTION

Deconvolution of partially overlapping tailing peaks in diode array high performance liquid chromatography using purity ratios, 705

DERIVATIZATION

Electrofunctional polymers: their role in the development of new analytical systems, 213

Urine polyamines determination using dansyl chloride derivatization in solid-phase extraction cartridges and HPLC, 477

Sampling of disocyanates (HDI, TDI) in air by derivatization with secondary amines as reagents. Part 1. Partial rate factors (PRF) of reagents, 933

Determination of ammonia and aliphatic amines in environmental aqueous samples utilizing pre-column derivatization to their phenylthioureas and high performance liquid chromatography, 1017

Optimisation using experimental designs of the sample pretreatment: application to the control of the organotins in sewage sludge by GC-FPD, 1265

DIESEL

Discrimination of diesel fuels with chemical sensors and mass spectrometry based electronic noses, 1167

DIFFERENTIAL-PULSE POLAROGRAPHY

Experimental design and multivariate calibration in the development, set-up and validation of a differential pulse polarographic and UV spectrophotometric method for the simultaneous plasmonic determination of the therapeutic metronidazole-pefloxacillin combination, 1683

DIFFUSION SCRUBBER

Development of an automated, simultaneous and continuous measurement system by using a diffusion scrubber coupled to ion chromatography for monitoring trace acidic and basic gases (HCl, HNO₃, SO₂ and NH₃) in the atmosphere, 1151

DIFFUSIVE SAMPLING

Evaluation of Carbo-pack B adsorbent for the tube-type diffusive sampling of volatile organic compounds at ambient concentration, 1859

DIODE ARRAY

Deconvolution of partially overlapping tailing peaks in diode array high performance liquid chromatography using purity ratios, 705

Integrated processing of triply coupled diode array liquid chromatography electrospray mass spectrometric signals by chemometric methods, 1733

DIODE-ARRAY DETECTION

Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971

DIODE LASER

Development of near-infrared fluorophoric labels for the determination of fatty acids separated by capillary electrophoresis with diode laser induced fluorescence detection, 1541

DIPICOLINIC ACID

Dipicolinic acid (DPA) assay revisited and appraised for spore detection, 1599

DNA

Quantification of Pt bound to DNA using total-reflection X-ray fluorescence (TXRF), 583

Simultaneous determination of guanine and adenine contents in DNA, RNA and synthetic oligonucleotides using a chemically modified electrode, 679

Interaction of a novel red-region fluorescent probe, Nile Blue, with DNA and its application to nucleic acids assay, 901

DRUG

Direct qualitative and quantitative characterization of a radiosensitizer, 5-iodo-2'-deoxyuridine within biodegradable polymeric microspheres by FT-Raman spectroscopy, 37

Bioassays for the detection of growth-promoting agents, veterinary drugs and environmental contaminants in food, 79

Immobilisation of thiabendazole specific antibodies on an agarose matrix for application in immunoaffinity chromatography, 87

Optimizing the balance between false positive and false negative error probabilities of confirmatory methods for the detection of veterinary drug residues, 109

On-line dialysis-SPE-CE of acidic drugs in biological samples, 115

Determination of thyrostatics in animal feed by micellar electrokinetic chromatography, 125

Ion-selective electrode for the determination of trazodone in tablets, 139

A rapid quantitative assay of intact paracetamol tablets by reflectance near-infrared spectroscopy, 163

Investigations by HPLC-electrospray mass spectrometry and NMR spectroscopy into the isomerisation of salinomycin, 251

Effect of cooking on veterinary drug residues in food Part 9.

Nitroimidazoles, 289

Immunochemical detection of aminoglycosides in milk and kidney, 301

Rapid automated spectrophotometric competitive complexation studies of drugs with cyclodextrins using the flow injection gradient technique: tricyclic antidepressant drugs with α -cyclodextrin, 391

Flow injection analysis-direct chemiluminescence determination of ergonovine maleate enhanced by hexadecylpyridinium chloride, 413

HPLC with fluorescence detection of methamphetamine and amphetamine in segmentally analyzed human hair, 493

A new and rapid method for the determination of nicarbazin residues in poultry feed, eggs and muscle tissue using supercritical fluid extraction and high performance liquid chromatography, 499

Spectrofluorimetric determination of piroxicam in the presence and absence of β -cyclodextrin, 587

Determination of testosterone:epitestosterone ratio after pentafluorophenyltrimethylsilyl-trimethylsilyl derivatization using gas chromatography-mass spectrometry in equine urine, 675

Analysis of tricyclic antidepressants using electrogenerated chemiluminescence, 759

Determination of trace sulfur in organic compounds by activated Raney nickel desulfurization method with non-dispersive gas detection system, 767

Novel spectrofluorimetric method for the determination of thiamine with iron(III) tetrasulfonatophthalocyanine as a catalyst, 771

A study of the effect of individual feed constituents on the recovery of avoparcin from compound animal feedingstuffs, 949

Chiral determination of various adrenergic drugs by thin-layer chromatography using molecularly imprinted chiral stationary phases prepared with α -agonists, 1003

A method for the separation of residues of nine compounds in cattle liver related to treatment with oxfendazole, 1023

Enhanced microdialysis recovery of some tricyclic antidepressants and structurally related drugs by cyclodextrin-mediated transport, 1027

Classification of cultivation area of ginseng radix with NIR and Raman spectroscopy, 1223

Evaluation of an immunobiosensor for the on-site testing of veterinary drug residues at an abattoir. Screening for sulfamethazine in pigs, 1315

Supercritical fluid extraction (SFE) as a multi-residue extraction procedure for β -agonists in bovine liver tissue, 1355

Determination of nicarbazin in feeds using liquid chromatography-electrospray mass spectrometry, 1431

Determination of dexamethasone in feed by TLC and HPLC, 1583

Construction and analytical application of ion-selective piezoelectric sensor for atropine sulfate, 1629

DUST

Spectrophotometric determination of lead with N-hydroxy-N,N'-diphenylbenzamidate and diphenylcarbazone in airborne dust particulates and soil, 1331

DYE

The performance of oxygen sensing films with ruthenium-adsorbed fumed silica dispersed in silicone rubber, 691

ELECTROANALYSIS

Electroanalytical signal processing method based on B-spline wavelets analysis, 739

Heterogeneous redox catalysis at conducting polymer ultramicroelectrodes, 1635

ELECTROCHEMICAL DESORPTION

A study of L-cysteine adsorption on gold *via* electrochemical desorption and copper(II) ion complexation, 1645

ELECTROCHEMILUMINESCENCE

Effect of metal ions on Ru(bpy)₃²⁺ electrochemiluminescence, 1085

ELECTROCHEMISTRY

Electrofunctional polymers: their role in the development of new analytical systems, 213

Demonstration of isoelectric focusing on an etched quartz chip with UV absorption imaging detection, 637

Wavelet frequency spectrum analysis of oscillograms, 893

Adsorptive and electrochemical behaviors of estradiol valerate at a mercury electrode, 1651

ELECTRODE

Cathodic stripping voltammetric determination of ultratrace gold(III) at a bulk modified epoxy-graphite tube composite electrode in flow systems, 353

Chromium(III)-selective electrode based on a macrocyclic compound, 521

Simultaneous determination of guanine and adenine contents in DNA, RNA and synthetic oligonucleotides using a chemically modified electrode, 679

Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865

Amperometric detection of gaseous ethanol and acetaldehyde at low concentrations on an Au-Nafion electrode, 871

Composition of sodium taurocholate micellar solutions, 887

Wavelet frequency spectrum analysis of oscillograms, 893

XPS characterization of nanosized overoxidized polypyrrole films on graphite electrodes, 1215

Porphyryns as carriers in poly(vinyl chloride)-based membrane potentiometric sensors for histamine, 1319

Field evaluation of a novel nitrate sensitive electrode in drainage waters from agricultural grassland, 1467

A study of L-cysteine adsorption on gold *via* electrochemical desorption and copper(II) ion complexation, 1645

Adsorptive and electrochemical behaviors of estradiol valerate at a mercury electrode, 1651

Voltammetric determination of trace mercury in concentrated chloride media using polymer-film electrodes modified with polyammonium macrocyclic receptors, 1661

Sono-cathodic stripping voltammetry of manganese at a polished boron-doped diamond electrode: application to the determination of manganese in instant tea, 1791

ELECTRON-CAPTURE DETECTOR

Removal of sulfur interfering in the analysis of organochlorines by GC-ECD, 1771

ELECTRON IMPACT

A scheme for the specific mass-spectrometer detection of radicals, 1065

ELECTRONIC NOSE

Discrimination of diesel fuels with chemical sensors and mass spectrometry based electronic noses, 1167

ELECTROOSMOSIS

Theoretical considerations of chemical reactions in micro-reactors operating under electroosmotic and electrophoretic control, 1273

ELECTROPHORESIS

Theoretical considerations of chemical reactions in micro-reactors operating under electroosmotic and electrophoretic control, 1273

ELECTROSPRAY

Investigations by HPLC-electrospray mass spectrometry and NMR spectroscopy into the isomerisation of salinomycin, 251

Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971

Determination of residues of the plant growth regulator chlormequat in pears by ion-exchange high performance liquid chromatography-electrospray mass spectrometry, 1011

Characterisation and determination of phytochelatins in plant extracts by electrospray tandem mass spectrometry, 1425

Determination of nicotinic acid in feeds using liquid chromatography-electrospray mass spectrometry, 1431

Integrated processing of triply coupled diode array liquid chromatography electrospray mass spectrometric signals by chemometric methods, 1733

ELECTROTHERMAL

Membrane solubilization with tetramethylammonium hydroxide for the preconcentration and electrothermal atomic absorption spectrometric determination of trace amounts of arsenic in water, 23

Alkaline solubilization of biological materials for trace element analysis by electrothermal atomic absorption spectrometry, 1843

ELECTROTHERMAL ATOMIC ABSORPTION

SPECTROMETRY

Determination of bismuth in aluminium and in steels by electrothermal atomic absorption spectrometry after on-line separation using a minicolumn of activated carbon, 1249

Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345

Determination of ultra-trace amounts of cadmium, cobalt and nickel in sea-water by electrothermal atomic absorption spectrometry with on-line preconcentration, 1695

ELEMENTAL ANALYSIS

Elemental content of Vietnamese rice. Part 1. Sampling, analysis and comparison with previous studies, 553

Elemental content of Vietnamese rice. Part 2. Multivariate analysis, 561

ELISA

Immunochemical detection of aminoglycosides in milk and kidney, 301

ENANTIOMERS

The effect of temperature and the composition of non-associating binary solvent mixtures on solute selectivity in liquid chromatography, 1745

ENERGY DISPERSIVE X-RAY FLUORESCENCE

SPECTROMETRY

Separation of microgram quantities of As(V), As(III) and organoarsenic species in aqueous solutions and determination by energy dispersive X-ray fluorescence spectrometry, 1105

ENVIRONMENTAL

Influence of sediment grain size on the efficiency of focused microwave extraction of polycyclic aromatic hydrocarbons, 5

Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophotometry, 49

Determination of polyaromatic hydrocarbons and some related compounds in industrial waste oils by GPC-HPLC-UV, 67

Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75

Bioassays for the detection of growth-promoting agents, veterinary drugs and environmental contaminants in food, 79

Flow probe for *in situ* electrochemical monitoring of trace chromium, 349

Rapid determination of molybdate in natural waters by coprecipitation and neutron activation analysis, 421

The determination of polychlorinated biphenyls in municipal sewage sludges using microwave-assisted extraction and gas chromatography-mass spectrometry, 453

Ion chromatographic separation of common mono- and divalent cations on an unmodified silica gel column by elution with oxalic acid containing crown ethers, 505

The measurement of ^{36}Cl and ^{129}I in concrete wastes, 627

Optimized procedure for the determination of antimony in lipid-rich environmental matrices by flow injection hydride generation atomic absorption spectrometry, 923

Determination of ammonia and aliphatic amines in environmental aqueous samples utilizing pre-column derivatization to their phenylthioureas and high performance liquid chromatography, 1017

Determination of ^{129}I in seawater and some environmental materials by neutron activation analysis, 1109

Laser photoacoustic spectrometry and its application for simulation of air pollution in a wind tunnel, 1205

An analytical method for the detection of methylantimony species in environmental matrices: methylantimony levels in some UK plant material, 1243

Flow injection determination of chemical oxygen demand in leaching liquid, 1251

HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291

Determination of methyl isocyanate in air by fluorimetry, 1327

Evaluation of on-line methodology for microwave-assisted extraction of polycyclic aromatic hydrocarbons (PAHs) from sediment samples, 1361

Ultrasonic extraction of hexavalent chromium in solid samples followed by automated analysis using a combination of supported liquid membrane extraction and UV detection in a flow system, 1367

Characterisation and determination of phytochelatins in plant extracts by electrospray tandem mass spectrometry, 1425

Field evaluation of a novel nitrate sensitive electrode in drainage waters from agricultural grassland, 1467

Isolation and identification of fluoranthene biodegradation products, 1765

On-line deoxygenation in reductive (and oxidative) amperometric detection: environmental applications in the liquid chromatography of organic peroxides, 1811

ENZYME

Modified gas-permeable silicone rubber membranes for covalent immobilisation of enzymes and their use in biosensor development, 1181

ENZYME IMMUNOASSAY

Reactivity of an immobilized anti-progesterone antiserum with homologous and heterologous progesterone-horseradish peroxidase conjugates, 313

ENZYME-LINKED IMMUNOSORBENT

Development of an ELISA for paraquat; improvement of antibody characteristics by reversed affinity chromatography, 847

ENZYME-LINKED IMMUNOSORBENT ASSAY

Increasing the sensitivity of *Listeria monocytogenes* assays: evaluation using ELISA and amperometric detection, 295

Production of monoclonal antibody and development of enzyme-linked immunosorbent assay for kanamycin in biological matrices, 1611

EQUILIBRIUM CONSTANT

Determination of equilibrium constant of alkylbenzenes binding to bovine serum albumin by solid phase microextraction, 1443

ERROR PROBABILITIES

Optimizing the balance between false positive and false negative error probabilities of confirmatory methods for the detection of veterinary drug residues, 109

ESTERIFICATION

Monitoring of the acid catalysed esterification of ethanol by acetic acid using Raman spectroscopy, 1817

ESTRADIOL

Adsorptive and electrochemical behaviors of estradiol valerate at a mercury electrode, 1651

ETHANOL

Amperometric detection of gaseous ethanol and acetaldehyde at low concentrations on an Au-Nafion electrode, 871

International interlaboratory study of forensic ethanol standards, 1123

Monitoring of the acid catalysed esterification of ethanol by acetic acid using Raman spectroscopy, 1817

ETHYLENEDIAMINETETRAACETIC ACID

Amperometric end-point detection of complexometric titrations with platinum microelectrodes, 1059

Effect of metal ions on Ru(bpy)₃²⁺ electrochemiluminescence, 1085

EUCALYPTUS CAMALDULENSIS

Characterization of within-tree variation of lignin components in *Eucalyptus camaldulensis* by pyrolysis-gas chromatography, 669

EXTRACTION

Classical wet ashing versus microwave-assisted attacks for the determination of chromium in plants, 1

Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75

Rapid separation of uranium and plutonium by extraction chromatography for determination by thermal ionisation mass spectrometry, 263

Determination of uranium and thorium in geological materials using extraction chromatography, 271

Trace determination of phenol, bisphenol A and bisphenol A diglycidyl ether in mixtures by excitation fluorescence following micro liquid-liquid extraction using partial least squares regression, 385

Comparison of pressurised fluid extraction and microwave assisted extraction with atmospheric pressure methods for extraction of additives from polypropylene, 397

Study of the stability of extractable phosphate content in a candidate reference material using a modified Williams extraction procedure, 407

Optimization of the solubilization, extraction and determination of inorganic arsenic [As(III) + As(V)] in seafood products by acid digestion, solvent extraction and hydride generation atomic absorption spectrometry, 601

Measurement uncertainty: Approaches to the evaluation of uncertainties associated with recovery, 981

Automated extraction chromatographic separations of actinides using separation-optimized sequential injection techniques, 1143

Multiresidue analysis of pesticides in vegetables and fruits using a high capacity adsorbent polymer for water, 1159

Pressurised hot water/steam extraction of polychlorinated dibenzofurans and naphthalenes from industrial soil, 1351

Ultrasonic extraction of hexavalent chromium in solid samples followed by automated analysis using a combination of supported liquid membrane extraction and UV detection in a flow system, 1367

Ammonium hydroxide pre-treatment as an aid to increasing extraction efficiencies of toxic metals from spent oxide waste, 1513

FACTOR ANALYSIS

Quantitative analysis of the Raman spectra of mixtures of weakly interacting components by factor analysis methods, 1481

FATTY ACID

Development of near-infrared fluorophoric labels for the determination of fatty acids separated by capillary electrophoresis with diode laser induced fluorescence detection, 1541

FEEDSTUFF

Determination of thyrostatics in animal feed by micellar electrokinetic chromatography, 125

Measurement of amorphous ferric phosphate to assess iron bioavailability in diets and diet ingredients, 425

A new and rapid method for the determination of nicarbazin residues in poultry feed, eggs and muscle tissue using supercritical fluid extraction and high performance liquid chromatography, 499

Determination of tryptophan in feed samples by cyclic voltammetry and multivariate calibration methods, 733

Cu(II)-amino acid and Cu(II)-peptide chelates in animal feeding: a semi-quantitative approach to characterize the commercial products and the limits of their structural integrity, 837

A study of the effect of individual feed constituents on the recovery of avoparcin from compound animal feedingstuffs, 949

Guidelines for in-house validation of analytical methods for pesticide residues in food and animal feeds, 953

Determination of nicarbazin in feeds using liquid chromatography-electrospray mass spectrometry, 1431

Determination of dexamethasone in feed by TLC and HPLC, 1583

FISH

Determination of malondialdehyde in traditional fish products by HPLC, 843

FLAME ATOMIC ABSORPTION SPECTROMETRY

Amberlite XAD-2 functionalized with chromotropic acid: synthesis of a new polymer matrix and its applications in metal ion enrichment for their determination by flame atomic absorption spectrometry, 1847

FLOW CELL

Flow analysis of micro amounts of chromium(III) and (VI) in natural water by solid phase spectrophotometry using diphenylcarbazide, 787

FLOW INJECTION

Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143

Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191

Flow injection determination of vitamin K₁ by a photoinduced chemiluminescent reaction, 197

Rapid determination of lactulose in milk by microdialysis and biosensors, 325

Cathodic stripping voltammetric determination of ultratrace gold(III) at a bulk modified epoxy-graphite tube composite electrode in flow systems, 353

Rapid automated spectrophotometric competitive complexation studies of drugs with cyclodextrins using the flow injection gradient technique: tricyclic antidepressant drugs with α -cyclodextrin, 391

Flow injection analysis-direct chemiluminescence determination of ergonovine maleate enhanced by hexadecylpyridinium chloride, 413

The use of emulsions for the determination of methylmercury and inorganic mercury in fish-eggs oil by cold vapor generation in a flow injection system with atomic absorption spectrometric detection, 593

Self-gelatinizable graft copolymer of poly(vinyl alcohol) with 4-vinylpyridine as an immobilization matrix for the construction of a tyrosinase-based amperometric biosensor, 699

A comparison of chemometric methods for the flow injection simultaneous spectrophotometric determination of aniline and cyclohexylamine, 745

Flow-injection chemiluminescence determination of isoniazid using on-line electrogenerated BrO⁻ as an oxidant, 763

Flow injection Fourier transform infrared determination of nicotine in tobacco, 783

Selectivity enhancement in spectrophotometry: on-line interference suppression using polyurethane foam minicolumn for aluminum determination with Methyl Thymol Blue, 805

Optimized procedure for the determination of antimony in lipid-rich environmental matrices by flow injection hydride generation atomic absorption spectrometry, 923

Evaluation of the 'antioxidant power' of olive oils based on a FIA system with amperometric detection, 1115

Determination of formaldehyde in liquid, solid and semisolid pharmaceuticals and cosmetics by flow injection-pervaporation, 1119

Determination of bismuth in aluminium and in steels by electrothermal atomic absorption spectrometry after on-line separation using a minicolumn of activated carbon, 1249

Flow injection determination of chemical oxygen demand in leaching liquid, 1251

Ultrasonic extraction of hexavalent chromium in solid samples followed by automated analysis using a combination of supported liquid membrane extraction and UV detection in a flow system, 1367

A robust multisyringe system for process flow analysis. Part I. On-line dilution and single point titration of protolutes, 1373

Flow injection determination of lactate based on a photochemical reaction using photometric and chemiluminescence detection, 1517

Automated stand-alone flow injection immunoanalysis system for the determination of cephalaxin in milk, 1605

An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727

The spectrophotometric determination of hydroperoxide and peroxide in a lipid pharmaceutical product by flow injection analysis, 1865

FLUORESCENCE

Comparison of four fluorescence Edman reagents with benzofuran structure for the detection of thiazolinone amino acid derivatives, 43

Surface partitioning studies of *N*-methylcarbamate-treated post-harvest crops using SFE-HPLC-postcolumn reaction-fluorescence, 275

Fluorescence properties of carbazole-9-ylpropionic acid and its application to the determination of amines via HPLC with fluorescence detection, 281

Static and time-resolved fluorescence of fluorescein-labeled dextran dissolved in aqueous solution or sequestered within a sol-gel-derived hydrogel, 373

HPLC with fluorescence detection of methamphetamine and amphetamine in segmentally analyzed human hair, 493

FLUORIDE

Indirect determination of trace amounts of fluoride in natural waters by ion chromatography: a comparison of on-line post-column fluorimetry and ICP-MS detectors, 27

FLUORIMETRY

Indirect determination of trace amounts of fluoride in natural waters by ion chromatography: a comparison of on-line post-column fluorimetry and ICP-MS detectors, 27

An impregnated filter sampling approach for determination of hydrogen cyanide in air by a kinetic-fluorimetric micellar method, 615

Determination of methyl isocyanate in air by fluorimetry, 1327

- Dipicolinic acid (DPA) assay revisited and appraised for spore detection, 1599
- Characterization and application of acridine-9-*N*-acetyl-*N*-hydroxysuccinimide as a pre-column derivatization agent for fluorimetric detection of amino acids in liquid chromatography, 1755
- FLUOROGENIC DERIVATIZATION REAGENT**
- A new fluorogenic reagent for carboxylic acids, 7-acetylamino-4-mercapto-2,1,3-benzoxadiazole (AABD-SH), derived from an empirical method for predicting fluorescence characteristics, 1689
- FOOD**
- Bioassays for the detection of growth-promoting agents, veterinary drugs and environmental contaminants in food, 79
- Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143
- Surface partitioning studies of *N*-methylcarbamate-treated post-harvest crops using SFE-HPLC-postcolumn reaction-fluorescence, 275
- Effect of cooking on veterinary drug residues in food. Part 9. Nitroimidazoles, 289
- Accuracy in naturally occurring anabolic steroid assays in cattle and first approach to quality control in Italy, 307
- Rapid determination of lactulose in milk by microdialysis and biosensors, 325
- Measurement of amorphous ferric phosphate to assess iron bioavailability in diets and diet ingredients, 425
- Determination of organochlorine pesticide residues in honey, applying solid phase extraction with RP-C18 material, 473
- A new and rapid method for the determination of nicarbazin residues in poultry feed, eggs and muscle tissue using supercritical fluid extraction and high performance liquid chromatography, 499
- Chromium(III)-selective electrode based on a macrocyclic compound, 521
- Elemental content of Vietnamese rice. Part 1. Sampling, analysis and comparison with previous studies, 553
- Elemental content of Vietnamese rice. Part 2. Multivariate analysis, 561
- Optimization of the solubilization, extraction and determination of inorganic arsenic [As(III) + As(V)] in seafood products by acid digestion, solvent extraction and hydride generation atomic absorption spectrometry, 601
- Novel spectrofluorimetric method for the determination of thiamine with iron(III) tetrasulfonatophthalocyanine as a catalyst, 771
- Determination of malondialdehyde in traditional fish products by HPLC, 843
- Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865
- Guidelines for in-house validation of analytical methods for pesticide residues in food and animal feeds, 953
- Determination of the arabica/robusta composition of roasted coffee according to their sterolic content, 999
- A method for the separation of residues of nine compounds in cattle liver related to treatment with oxfendazole, 1023
- Simultaneous determination of benzoic acid and saccharin in soft drinks by using lanthanide-sensitized luminescence, 1079
- Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159
- Determination of organochlorine pesticide residues in foods using solid-phase extraction clean-up cartridges, 1287
- Evaluation of an immunobiosensor for the on-site testing of veterinary drug residues at an abattoir. Screening for sulfamethazine in pigs, 1315
- FORENSIC**
- Rapid screening of banknotes for the presence of controlled substances by thermal desorption atmospheric pressure chemical ionisation tandem mass spectrometry, 103
- Determination of testosterone:epitestosterone ratio after pentafluorophenyltrimethylsilyl-trimethylsilyl derivatisation using gas chromatography-mass spectrometry in equine urine, 675
- FORMALDEHYDE**
- Determination of formaldehyde in liquid, solid and semisolid pharmaceuticals and cosmetics by flow injection-pervaporation, 1119
- FOURIER TRANSFORM**
- Direct qualitative and quantitative characterization of a radiosensitizer, 5-iodo-2'-deoxyuridine within biodegradable polymeric microspheres by FT-Raman spectroscopy, 37
- Solid phase Fourier transform near infrared spectroscopy, 579
- Wavelet frequency spectrum analysis of oscillograms, 893
- Experimental demonstration and simulation of electrochemical non-linear responses to glucose and its interferents with an amperometric sensor, 1175
- Minimum: FT-Raman non-destructive analysis applied to an historical controversy, 1323
- Quantitative FT-Raman spectroscopy to measure wood cell dimensions, 1477
- FOURIER TRANSFORM INFRARED SPECTROSCOPY**
- A flexible method of carbonate determination using an automatic gas analyzer equipped with an FTIR photoacoustic measurement chamber, 361
- Simultaneous determination of the pesticide naptalam and its metabolites in natural water by Fourier transform infrared spectrometry, 367
- Solid phase Fourier transform near infrared spectroscopy, 579
- Flow injection Fourier transform infrared determination of nicotine in tobacco, 783
- Supercritical fluid extraction and chromatography of non-ionic surfactants combined with FTIR, APCI-MS and FID detection, 1501
- FRACTIONATION**
- Fractionation of soluble selenium compounds from fish using size-exclusion chromatography with on-line detection by inductively coupled plasma mass spectrometry, 1435
- FRUIT**
- Determination of residues of the plant growth regulator chlormequat in pears by ion-exchange high performance liquid chromatography-electrospray mass spectrometry, 1011
- Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159
- FRUIT JUICE**
- Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865
- FUEL**
- Discrimination of diesel fuels with chemical sensors and mass spectrometry based electronic noses, 1167
- FULLERENE**
- Determination of sulfur as an impurity in commercial C₆₀, fullerene soot and sublimed C₆₀ polycrystals by INAA, 417
- GAS ANALYSER**
- Determination of trace sulfur in organic compounds by activated Raney nickel desulfurization method with non-dispersive gas detection system, 767
- GAS CHROMATOGRAPHY**
- Determination of methylcyclopentadienylmanganese tricarbonyl (MMT) in aqueous samples by SPME-GC-AED, 71
- Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75
- Studies of organic residues from ancient Egyptian mummies using high temperature-gas chromatography-mass spectrometry and sequential thermal desorption-gas chromatography-mass spectrometry and pyrolysis-gas chromatography-mass spectrometry, 443
- The determination of polychlorinated biphenyls in municipal sewage sludges using microwave-assisted extraction and gas chromatography-mass spectrometry, 453
- In-tube solid phase micro-extraction-gas chromatography of volatile compounds in aqueous solution, 651
- Gas chromatographic determination of some alkoxysilanes for use in occupational exposure assessment, 665
- Characterization of within-tree variation of lignin components in *Eucalyptus camaldulensis* by pyrolysis-gas chromatography, 669
- Determination of testosterone:epitestosterone ratio after pentafluorophenyltrimethylsilyl-trimethylsilyl derivatisation using gas chromatography-mass spectrometry in equine urine, 675
- Determination of the arabica/robusta composition of roasted coffee according to their sterolic content, 999
- Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159
- Optimisation using experimental designs of the sample pretreatment: application to the control of the organotins in sewage sludge by GC-FPD, 1265
- Solid-phase microextraction for the determination of pethidine and methadone in human urine using gas chromatography with nitrogen-phosphorus detection, 1283
- GC-MS determination of steroids related to androgen biosynthesis in human hair with pentafluorophenyltrimethylsilyl-trimethylsilyl derivatisation, 1297
- Determination of equilibrium constant of alkylbenzenes binding to bovine serum albumin by solid phase microextraction, 1443
- Determination of methylmercury and inorganic mercury in whole blood by headspace, cryofocusing gas chromatography and atomic absorption spectrometry, 1493
- Identification of non-target compounds using gas chromatography with simultaneous atomic emission and mass spectrometric detection (GC-AED/MS): analysis of municipal wastewater, 1547
- Adsorption of water vapour in the solid sorbents used for the sampling of volatile organic compounds, 1553
- Sensitive gas chromatographic-mass spectrometric method for the determination of gacyclidine in rat plasma and spinal cord dialyzates, 1761
- Isolation and identification of fluoranthene biodegradation products, 1765
- Removal of sulfur interfering in the analysis of organochlorines by GC-ECD, 1771
- GEL ELECTROPHORESIS**
- Interaction of a novel red-region fluorescent probe, Nile Blue, with DNA and its application to nucleic acids assay, 901
- GENETIC PROGRAMS**
- The detection of caffeine in a variety of beverages using Curie-point pyrolysis mass spectrometry and genetic programming, 1069
- GEOCHEMISTRY**
- Oxidation of dimethyl sulfide to dimethyl sulfoxide in liquefied petroleum gas prior to piezoelectric crystal detection, 153

- Determination of 17 trace elements in coal and ash reference materials by ICP-MS applied to milligram sample sizes, 177
- GEOLOGICAL**
Determination of uranium and thorium in geological materials using extraction chromatography, 271
Analytical techniques for the determination of precious metals in geological and related materials, 1531
- GLASSY CARBON ELECTRODE**
Anodic stripping voltammetry of copper at insonated glassy carbon-based electrodes: application to the determination of copper in beer, 1053
- GLUCOSE**
Three approaches to the development of selective bilayer amperometric biosensors for glucose by *in situ* electropolymerization, 319
Experimental demonstration and simulation of electrochemical non-linear responses to glucose and its interferents with an amperometric sensor, 1175
- GLUTATHIONE PEROXIDASE**
Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749
- GOLD**
Cathodic stripping voltammetric determination of ultratrace gold(III) at a bulk modified epoxy-graphite tube composite electrode in flow systems, 353
- GOLD ELECTRODE**
Apparent enhanced underpotential voltammetry of lead(II) at a spontaneously adsorbed monolayer-coated gold electrode, 1797
- GUANINE**
Simultaneous determination of guanine and adenine contents in DNA, RNA and synthetic oligonucleotides using a chemically modified electrode, 679
- GUNSHOT RESIDUES**
Detection of *N,N'*-diphenyl-*N,N'*-dimethylurea (methyl centralite) in gunshot residues using MS-MS method, 1563
- HADAMARD TECHNIQUE**
Multi-electrode detection in voltammetry. Part 3. Effects of array configuration on the Hadamard multiplexed voltammetric technique, 1657
- HERBICIDE**
Conductimetric sensor for atrazine detection based on molecularly imprinted polymer membranes, 331
Screen-printed zeolite-modified carbon electrodes, 1185
- HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY**
Determination of polyaromatic hydrocarbons and some related compounds in industrial waste oils by GPC-HPLC-UV, 67
Determination of hexamethylene diisocyanate-based isocyanates in spray-painting operations. Part 2. Comparison of high performance liquid chromatography with capillary zone electrophoresis, 119
Procrustes analysis for the comparison of test methods in reversed-phase high performance liquid chromatography of basic compounds, 227
Investigations by HPLC-electrospray mass spectrometry and NMR spectroscopy into the isomerisation of salinomycin, 251
Surface partitioning studies of *N*-methylcarbamate-treated post-harvest crops using SFE-HPLC-postcolumn reaction-fluorescence, 275
Fluorescence properties of carbazole-9-ylpropionic acid and its application to the determination of amines *via* HPLC with fluorescence detection, 281
Effect of cooking on veterinary drug residues in food. Part 9. Nitroimidazoles, 289
Urine polyamines determination using dansyl chloride derivatization in solid-phase extraction cartridges and HPLC, 477
Multi-beam circular dichroism detector for HPLC, 483
Application of cloud-point methodology to the determination of polychlorinated dibenzofurans in sea water by high-performance liquid chromatography, 487
HPLC with fluorescence detection of methamphetamine and amphetamine in segmentally analyzed human hair, 493
A new and rapid method for the determination of nicarbazin residues in poultry feed, eggs and muscle tissue using supercritical fluid extraction and high performance liquid chromatography, 499
Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657
Deconvolution of partially overlapping tailing peaks in diode array high performance liquid chromatography using purity ratios, 705
A rapid ultrasonic extraction technique to identify and quantify additives in poly(ethylene), 797
Fully automated determination of vitamins A and E in milk-based products using a robotic station-HPLC arrangement, 801
Simultaneous determination of inulin and *p*-aminohippuric acid (PAH) in human plasma and urine by high-performance liquid chromatography, 833
Cu(II)-amino acid and Cu(II)-peptide chelates in animal feeding: a semi-quantitative approach to characterize the commercial products and the limits of their structural integrity, 837
Determination of malondialdehyde in traditional fish products by HPLC, 843
Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971
Determination of residues of the plant growth regulator chlormequat in pears by ion-exchange high performance liquid chromatography-electrospray mass spectrometry, 1011
Determination of ammonia and aliphatic amines in environmental aqueous samples utilizing pre-column derivatization to their phenylthioureas and high performance liquid chromatography, 1017
HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291
Determination of dexamethasone in feed by TLC and HPLC, 1583
An HPLC assay for the determination of ketoconazole in common pharmaceutical preparations, 1589
Integrated processing of triply coupled diode array liquid chromatography electrospray mass spectrometric signals by chemometric methods, 1733
Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749
- HIGH-PERFORMANCE THIN LAYER CHROMATOGRAPHY**
Utilization of a scientifically operated charge-coupled device detector for high-performance thin-layer chromatographic analysis of tetracyclines, 1577
Determination of dexamethasone in feed by TLC and HPLC, 1583
- HILDEBRAND SOLUBILITY PARAMETER**
A simple solvent selection method for accelerated solvent extraction of additives from polymers, 1707
- HISTAMINE**
Porphyrins as carriers in poly(vinyl chloride)-based membrane potentiometric sensors for histamine, 1319
- HONEY**
Determination of organochlorine pesticide residues in honey, applying solid phase extraction with RP-C18 material, 473
- HYBRID LINEAR ANALYSIS**
Wavelength selection by net analyte signals calculated with multivariate factor-based hybrid linear analysis (HLA). A theoretical and experimental comparison with partial least-squares (PLS), 725
- HYBRIDIZATION**
High density oligonucleotide and DNA probe arrays for the analysis of target DNA, 1133
- HYDRIDE GENERATION**
Optimization of the solubilization, extraction and determination of inorganic arsenic [As(III) + As(V)] in seafood products by acid digestion, solvent extraction and hydride generation atomic absorption spectrometry, 601
Development and evaluation of an analytical procedure for the determination of antimony in plant materials by hydride generation atomic absorption spectrometry, 777
Optimized procedure for the determination of antimony in lipid-rich environmental matrices by flow injection hydride generation atomic absorption spectrometry, 923
- HYDROCARBON**
Multivariate determination of several compositional parameters related to the content of hydrocarbon in naphtha by MIR spectroscopy, 1827
- HYDROGEN PEROXIDE**
Highly sensitive spectrofluorimetric determination of hydrogen peroxide with β -cyclodextrin-hemin as catalyst, 173
- HYDROPEROXIDE**
The spectrophotometric determination of hydroperoxide and peroxide in a lipid pharmaceutical product by flow injection analysis, 1865
- HYDROPHOBIC INTERACTION CHROMATOGRAPHY**
²⁰³Hg labelled PHMB as reagent for the determination of -SH groups in native and denatured proteins by hydrophobic interaction chromatography, 511
- HYPOCHLORITE**
The use of nitrite ion in the chromatographic determination of large amounts of hypochlorite ion and of traces of chlorite and chlorate ions, 1439
- IMMUNOAFFINITY CHROMATOGRAPHY**
Immobilisation of thiabendazole specific antibodies on an agarose matrix for application in immunoaffinity chromatography, 87
Production and characterization of polyclonal antibodies to sulfamethazine and their potential use in immunoaffinity chromatography for urine sample pre-treatment, 1569
- IMMUNOASSAY**
Accuracy in naturally occurring anabolic steroid assays in cattle and first approach to quality control in Italy, 307
Automated stand-alone flow injection immunoanalysis system for the determination of cephalixin in milk, 1605
- IMMUNOSENSOR**
Increasing the sensitivity of *Listeria monocytogenes* assays: evaluation using ELISA and amperometric detection, 295
- IMPURITY ANALYSIS**
Determination of trace metal impurities in high purity silver by two step selective precipitation separation followed by neutron activation analysis, 15

INDUCTIVELY COUPLED PLASMA

- Determination of 17 trace elements in coal and ash reference materials by ICP-MS applied to milligram sample sizes, 177
- Determination of total tin in sediment reference materials by isotope dilution inductively coupled plasma mass spectrometry after alkali fusion, 257
- Preconcentration of ultratrace rare earth elements in seawater with 8-hydroxyquinoline immobilized polyacrylonitrile hollow fiber membrane for determination by inductively coupled plasma mass spectrometry, 621
- A fast method for the simultaneous determination of ^{230}Th , ^{234}U and ^{235}U with isotope dilution sector field ICP-MS, 927
- Speciation of metabolites of selenate in rats by HPLC-ICP-MS, 1237
- Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749

INDUCTIVELY COUPLED PLASMA ATOMIC EMISSION SPECTROMETRY

- Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657

INDUCTIVELY COUPLED PLASMA MASS SPECTROMETRY

- Indirect determination of trace amounts of fluoride in natural waters by ion chromatography: a comparison of on-line post-column fluorimetry and ICP-MS detectors, 27
- Preconcentration of ultratrace rare earth elements in seawater with 8-hydroxyquinoline immobilized polyacrylonitrile hollow fiber membrane for determination by inductively coupled plasma mass spectrometry, 621
- Use of gold as a routine and long term preservative for mercury in potable water, as determined by ICP-MS, 1233
- Determination of low concentrations of potentially toxic elements in human liver from newborns and infants, 1337
- Fractionation of soluble selenium compounds from fish using size-exclusion chromatography with on-line detection by inductively coupled plasma mass spectrometry, 1435

INDUSTRIAL

- Flow injection determination of chemical oxygen demand in leaching liquid, 1251
- Pressurised hot water/steam extraction of polychlorinated dibenzofurans and naphthalenes from industrial soil, 1351

INFRARED SPECTROSCOPY

- Infrared emission study of the thermal transformation mechanism of Al_2O_3 -pillared clay, 381
- Multivariate determination of several compositional parameters related to the content of hydrocarbon in naphtha by MIR spectroscopy, 1827

INORGANIC CARBONATE

- A flexible method of carbonate determination using an automatic gas analyzer equipped with an FTIR photoacoustic measurement chamber, 361

INTERFEROMETRY

- Universal detection in capillary electrophoresis with a micro-interferometric backscatter detector, 221

INTERLABORATORY STUDY

- International interlaboratory study of forensic ethanol standards, 1123

INTERNAL STANDARD

- Determination of copper and zinc in blood plasma by ion chromatography using a cobalt internal standard, 245

INULIN

- Simultaneous determination of inulin and *p*-aminhippuric acid (PAH) in human plasma and urine by high-performance liquid chromatography, 833

IODINE

- The measurement of ^{130}I and ^{129}I in concrete wastes, 627

ION CHROMATOGRAPHY

- Indirect determination of trace amounts of fluoride in natural waters by ion chromatography: a comparison of on-line post-column fluorimetry and ICP-MS detectors, 27

ION CHROMATOGRAPHY

- Determination of copper and zinc in blood plasma by ion chromatography using a cobalt internal standard, 245
- Ion chromatographic separation of common mono- and divalent cations on an unmodified silica gel column by elution with oxalic acid containing crown ethers, 505

- Development of an automated, simultaneous and continuous measurement system by using a diffusion scrubber coupled to ion chromatography for monitoring trace acidic and basic gases (HCl , HNO_3 , SO_2 and NH_3) in the atmosphere, 1151

- The use of nitrite ion in the chromatographic determination of large amounts of hypochlorite ion and of traces of chlorite and chlorate ions, 1439

ION-SELECTIVE ELECTRODE

- Preparation and application of a trimethoprim ion-selective piezoelectric sensor, 91
- Construction and evaluation of ion selective electrodes for perchlorate with a summing operational amplifier: application to pyrotechnics mixtures analysis, 97
- Determination of live clay in foundry greensand by sodium-selective electrode, 135
- Ion-selective electrode for the determination of trazodone in tablets, 139

- Development of a sensitive nitrate-selective electrode for on-site use in fresh waters, 877

- Simultaneous determination of changes in the permeability of two different liposomes mimicking bacterial and eukaryotic cell membranes using ion-selective electrodes, 883

- Multivariate standardization techniques on ion-selective sensor arrays, 1045

IRON

- Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191
- Measurement of amorphous ferric phosphate to assess iron bioavailability in diets and diet ingredients, 425
- Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657

ISOELECTRIC FOCUSING

- Demonstration of isoelectric focusing on an etched quartz chip with UV absorption imaging detection, 637

ISONIAZID

- Flow-injection chemiluminescence determination of isoniazid using on-line electrogenerated BrO^- as an oxidant, 763

ISOTOPE DILUTION

- Determination of total tin in sediment reference materials by isotope dilution inductively coupled plasma mass spectrometry after alkali fusion, 257
- A fast method for the simultaneous determination of ^{230}Th , ^{234}U and ^{235}U with isotope dilution sector field ICP-MS, 927

ISOTOPE RATIO MASS SPECTROMETRY

- Novel calibration with correction for drift and non-linear response for continuous flow isotope ratio mass spectrometry applied to the determination of $\delta^{15}\text{N}$, total nitrogen, $\delta^{13}\text{C}$ and total carbon in biological material, 571

KANAMYCIN

- Production of monoclonal antibody and development of enzyme-linked immunosorbent assay for kanamycin in biological matrices, 1611

KAOLINITE

- Photoacoustic thermal characterization of kaolinite clays, 1209

KELVIN MICROPROBE

- Scanning Kelvin microprobe in the tandem analysis of surface topography and chemistry, 961

KETOCONAZOLE

- An HPLC assay for the determination of ketoconazole in common pharmaceutical preparations, 1589

KETONES

- HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291

KIDNEY

- Immunochemical detection of aminoglycosides in milk and kidney, 301

KINETICS

- An impregnated filter sampling approach for determination of hydrogen cyanide in air by a kinetic-fluorimetric micellar method, 615
- Kinetic analysis of consecutive reactions using a non-linear least-squares error-compensation algorithm, 751
- Kinetic spectrophotometric determination of hydrocortisone acetate in a pharmaceutical preparation by use of partial least-squares regression, 911

KJELDAHL NITROGEN

- The use of microwaves in the acceleration of digestion and colour development in the determination of total Kjeldahl nitrogen in soil, 1719

L-CYSTEINE

- A study of L-cysteine adsorption on gold *via* electrochemical desorption and copper(II) ion complexation, 1645

LACTATE

- Flow injection determination of lactate based on a photochemical reaction using photometric and chemiluminescence detection, 1517

LACTULOSE

- Rapid determination of lactulose in milk by microdialysis and biosensors, 325

LANTHANIDE

- Simultaneous determination of benzoic acid and saccharin in soft drinks by using lanthanide-sensitized luminescence, 1079

LASER-INDUCED FLUORESCENCE

- Development of near-infrared fluorophoric labels for the determination of fatty acids separated by capillary electrophoresis with diode laser induced fluorescence detection, 1541

LASER PHOTOACOUSTIC SPECTROMETRY

- Laser photoacoustic spectrometry and its application for simulation of air pollution in a wind tunnel, 1205

LEAD

- Detection of lead(II) and silver(I) in aqueous solution using a piezoelectric device, 859
- Synthesis of meso-tetra-(3,5-dibromo-4-hydroxyphenyl)-porphyrin and its application to second-derivative spectrophotometric determination of lead in clinical samples, 1227
- Spectrophotometric determination of lead with *N*-hydroxy-*N,N'*-diphenylbenzidine and diphenylcarbazone in airborne dust particulates and soil, 1331

- Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345
- Apparent enhanced underpotential voltammetry of lead(II) at a spontaneously adsorbed monolayer-coated gold electrode, 1797
- LIGNIN**
Characterization of within-tree variation of lignin components in *Eucalyptus camaldulensis* by pyrolysis-gas chromatography, 669
- LIPIDS**
Determination of total lipid using non-chlorinated solvents, 1711
The spectrophotometric determination of hydroperoxide and peroxide in a lipid pharmaceutical product by flow injection analysis, 1865
- LIPIDOMES**
Simultaneous determination of changes in the permeability of two different lipidomes mimicking bacterial and eukaryotic cell membranes using ion-selective electrodes, 883
- LIQUID CHROMATOGRAPHY**
Automated trace enrichment for screening and/or determination of primary, secondary and tertiary amphetamines in biological samples by liquid chromatography, 239
Determination of vitamins D₂, D₃, K₁ and K₂ and some hydroxy metabolites of vitamin D₃ in plasma using a continuous clean-up-preconcentration procedure coupled on-line with liquid chromatography-UV detection, 401
Optimum operating conditions for chiral separations in liquid chromatography, 713
Automated extraction chromatographic separations of actinides using separation-optimized sequential injection techniques, 1143
Determination of nicarbazin in feeds using liquid chromatography-electrospray mass spectrometry, 1431
Liquid chromatographic selectivity and retention behavior of rare-earth elements on a chelating resin having a propylenediaminetetraacetate type functional group, 1595
Integrated processing of triply coupled diode array liquid chromatography-electrospray mass spectrometric signals by chemometric methods, 1733
The effect of temperature and the composition of non-associating binary solvent mixtures on solute selectivity in liquid chromatography, 1745
Characterization and application of acridine-9-N-acetyl-N-hydroxysuccinimide as a pre-column derivatization agent for fluorimetric detection of amino acids in liquid chromatography, 1755
On-line deoxygenation in reductive (and oxidative) amperometric detection: environmental applications in the liquid chromatography of organic peroxides, 1811
- LUMINESCENCE**
Polarization-based oxygen sensor, 1041
Improved detection of salicylic acids using terbium-sensitized luminescence in aqueous micellar solutions of cetyltrimethylammonium chloride, 1075
Simultaneous determination of benzoic acid and saccharin in soft drinks by using lanthanide-sensitized luminescence, 1079
Response characteristics of optical sensors for oxygen: models based on a distribution in τ_0 or k_q , 1301
- LUMINESCENCE QUENCHING**
Linear calibration function of luminescence quenching-based optical sensor for trace oxygen analysis, 695
- MACROMOLECULES**
Acoustic waves and the study of biochemical macromolecules and cells at the sensor-liquid interface, 1405
- MANGANESE**
Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191
Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657
Sono-cathodic stripping voltammetry of manganese at a polished boron-doped diamond electrode: application to the determination of manganese in instant tea, 1791
- MARGARINE**
Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143
- MARINE TISSUES**
Determination of total lipid using non-chlorinated solvents, 1711
- MASS SPECTROMETRY**
Indirect determination of trace amounts of fluoride in natural waters by ion chromatography: a comparison of on-line post-column fluorimetry and ICP-MS detectors, 27
Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75
Determination of 17 trace elements in coal and ash reference materials by ICP-MS applied to milligram sample sizes, 177
Investigations by HPLC-electrospray mass spectrometry and NMR spectroscopy into the isomerisation of salinomycin, 251
Determination of total tin in sediment reference materials by isotope dilution inductively coupled plasma mass spectrometry after alkali fusion, 257
Studies of organic residues from ancient Egyptian mummies using high temperature-gas chromatography-mass spectrometry and sequential thermal desorption-gas chromatography-mass spectrometry and pyrolysis-gas chromatography-mass spectrometry, 443
The determination of polychlorinated biphenyls in municipal sewage sludges using microwave-assisted extraction and gas chromatography-mass spectrometry, 453
Determination of testosterone:epitestosterone ratio after pentafluorophenyltrimethylsilyl-trimethylsilyl derivatisation using gas chromatography-mass spectrometry in equine urine, 675
The analysis of β -agonists by packed-column, 827
A fast method for the simultaneous determination of ^{230}Th , ^{234}U and ^{238}U with isotope dilution sector field ICP-MS, 927
Chemometric techniques for exploring complex chromatograms: application of diode array detection high performance liquid chromatography-electrospray ionisation mass spectrometry to chlorophyll *a* allomers, 971
Separation and characterisation of phenol-formaldehyde (resol) prepolymers using packed-column supercritical fluid chromatography with APCI mass spectrometric detection, 993
Determination of residues of the plant growth regulator chlormequat in pears by ion-exchange high performance liquid chromatography-electrospray mass spectrometry, 1011
A scheme for the specific mass-spectrometer detection of radicals, 1065
The detection of caffeine in a variety of beverages using Curie-point pyrolysis mass spectrometry and genetic programming, 1069
Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159
Discrimination of diesel fuels with chemical sensors and mass spectrometry based electronic noses, 1167
Speciation of metabolites of selenate in rats by HPLC-ICP-MS, 1237
HPLC-APCI-MS with calibration based on stable isotope-labelled internal standards for the quantification of carbonyls in air samples, 1291
GC-MS determination of steroids related to androgen biosynthesis in human hair with pentafluorophenyltrimethylsilyl-trimethylsilyl derivatisation, 1297
Determination of low concentrations of potentially toxic elements in human liver from newborns and infants, 1337
A new purge-and-membrane mass spectrometric (PAM-MS) instrument for analysis of volatile organic compounds in soil samples, 1421
Characterisation and determination of phytochelatin in plant extracts by electrospray tandem mass spectrometry, 1425
Supercritical fluid extraction and chromatography of non-ionic surfactants combined with FTIR, APCI-MS and FID detection, 1501
Identification of non-target compounds using gas chromatography with simultaneous atomic emission and mass spectrometric detection (GC-AED/MS): analysis of municipal wastewater, 1547
Detection of N,N'-diphenyl-N,N'-dimethylurea (methyl centralite) in gunshot residues using MS-MS method, 1563
Integrated processing of triply coupled diode array liquid chromatography-electrospray mass spectrometric signals by chemometric methods, 1733
Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749
Sensitive gas chromatographic-mass spectrometric method for the determination of gacyclidine in rat plasma and spinal cord dialyzates, 1761
Isolation and identification of fluoranthene biodegradation products, 1765
- MATHEMATICS**
A model of thermally generated pH gradients in tapered capillaries, 335
A top-down in-house validation based approach for the investigation of the measurement uncertainty using fractional factorial experiments, 537
Kinetic analysis of consecutive reactions using a non-linear least-squares error-compensation algorithm, 751
Measurement uncertainty: Approaches to the evaluation of uncertainties associated with recovery, 981
A program for the weighted linear least-squares regression of unbalanced response arrays, 1191
Response characteristics of optical sensors for oxygen: models based on a distribution in τ_0 or k_q , 1301
- MEASUREMENT UNCERTAINTY**
Measurement uncertainty: Approaches to the evaluation of uncertainties associated with recovery, 981
Uncertainty of measurement in spectrophotometric analysis: A case study, 1099
- MEMBRANE**
Anion-sensitive field-effect transistors based on sol-gel-derived membranes incorporating quaternary ammonium salts, 517
Modified gas-permeable silicone rubber membranes for covalent immobilisation of enzymes and their use in biosensor development, 1181
- MERCURY**
Determination of total mercury in hydrocarbons and natural gas condensate by atomic fluorescence spectrometry, 185

- The use of emulsions for the determination of methylmercury and inorganic mercury in fish-eggs oil by cold vapor generation in a flow injection system with atomic absorption spectrometric detection, 593
- Use of gold as a routine and long term preservative for mercury in potable water, as determined by ICP-MS, 1233
- Determination of methylmercury and inorganic mercury in whole blood by headspace, cryofocusing gas chromatography and atomic absorption spectrometry, 1493
- Adsorptive and electrochemical behaviors of estradiol valerate at a mercury electrode, 1651
- Voltammetric determination of trace mercury in concentrated chloride media using polymer-film electrodes modified with polyammonium macrocyclic receptors, 1661
- METAL**
- Determination of trace metal impurities in high purity silver by two step selective precipitation separation followed by neutron activation analysis, 15
- Extraction and recovery of metals using a supercritical fluid with chelating agents, 609
- Ammonium hydroxide pre-treatment as an aid to increasing extraction efficiencies of toxic metals from spent oxide waste, 1513
- METAL IONS**
- Effect of metal ions on Ru(bpy)₃²⁺ electrochemiluminescence, 1085
- METHADONE**
- Solid-phase microextraction for the determination of pethidine and methadone in human urine using gas chromatography with nitrogen-phosphorus detection, 1283
- METHYL ISOCYANATE**
- Determination of methyl isocyanate in air by fluorimetry, 1327
- METHYLANTIMONY**
- An analytical method for the detection of methylantimony species in environmental matrices: methylantimony levels in some UK plant material, 1243
- METRONIDAZOLE**
- Experimental design and multivariate calibration in the development, set-up and validation of a differential pulse polarographic and UV spectrophotometric method for the simultaneous plasmatic determination of the therapeutic metronidazole-pefloxacacin combination, 1683
- MICELLAR ELECTROKINETIC CHROMATOGRAPHY**
- Determination of thyrostatics in animal feed by micellar electrokinetic chromatography, 125
- MICELLE**
- An impregnated filter sampling approach for determination of hydrogen cyanide in air by a kinetic-fluorimetric micellar method, 615
- Composition of sodium taurocholate micellar solutions, 887
- Improved detection of salicylic acids using terbium-sensitized luminescence in aqueous micellar solutions of cetyltrimethylammonium chloride, 1075
- MICRO-RAMAN SPECTROSCOPY**
- Pigment investigation of a late-medieval manuscript with total reflection X-ray fluorescence and micro-Raman spectroscopy, 169
- MICRO-REACTOR**
- Theoretical considerations of chemical reactions in micro-reactors operating under electroosmotic and electrophoretic control, 1273
- MICRODIALYSIS**
- Rapid determination of lactulose in milk by microdialysis and biosensors, 325
- Enhanced microdialysis recovery of some tricyclic antidepressants and structurally related drugs by cyclodextrin-mediated transport, 1027
- MICROWAVE DIGESTION**
- The use of microwaves in the acceleration of digestion and colour development in the determination of total Kjeldahl nitrogen in soil, 1719
- MICROWAVE EXTRACTION**
- Influence of sediment grain size on the efficiency of focused microwave extraction of polycyclic aromatic hydrocarbons, 5
- Comparison of pressurised fluid extraction and microwave assisted extraction with atmospheric pressure methods for extraction of additives from polypropylene, 397
- The determination of polychlorinated biphenyls in municipal sewage sludges using microwave-assisted extraction and gas chromatography-mass spectrometry, 453
- Recovery of some common solvents from protective clothing breakthrough indicator pads by microwave-solvent extraction and gas chromatography, 941
- Evaluation of on-line methodology for microwave-assisted extraction of polycyclic aromatic hydrocarbons (PAHs) from sediment samples, 1361
- MILK**
- Immunochemical detection of aminoglycosides in milk and kidney, 301
- Rapid determination of lactulose in milk by microdialysis and biosensors, 325
- Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865
- MILK PRODUCTS**
- Fully automated determination of vitamins A and E in milk-based products using a robotic station-HPLC arrangement, 801
- MIOKAMYCIN**
- Development and validation of methods for the determination of miokamycin in various pharmaceutical preparations by use of near infrared reflectance spectroscopy, 1089
- MIXTURE ANALYSIS**
- Relationship between sample mass and number of particles for two-component particulate mixtures, 945
- MOLECULAR IMPRINTED POLYMERS**
- Methodology for assessing the properties of molecular imprinted polymers for solid phase extraction, 467
- MOLYBDENUM**
- Rapid determination of molybdate in natural waters by coprecipitation and neutron activation analysis, 421
- MONOCLONAL ANTIBODY**
- Production of monoclonal antibody and development of enzyme-linked immunosorbent assay for kanamycin in biological matrices, 1611
- MOSSBAUER SPECTROSCOPY**
- Artificial neural network approach to the evaluation of the coordination geometry in organotin(IV) compounds, 721
- MULTIVARIATE ANALYSIS**
- Elemental content of Vietnamese rice, 561
- Multivariate determination of several compositional parameters related to the content of hydrocarbon in naphtha by MIR spectroscopy, 1827
- MULTIVARIATE CALIBRATION**
- Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophosphorimetry, 49
- Determination of tryptophan in feed samples by cyclic voltammetry and multivariate calibration methods, 733
- A comparison of chemometric methods for the flow injection simultaneous spectrophotometric determination of aniline and cyclohexylamine, 745
- Multivariate standardization techniques on ion-selective sensor arrays, 1045
- Experimental design and multivariate calibration in the development, set-up and validation of a differential pulse polarographic and UV spectrophotometric method for the simultaneous plasmatic determination of the therapeutic metronidazole-pefloxacacin combination, 1683
- MULTIVARIATE MODELLING**
- Optimizing the balance between false positive and false negative error probabilities of confirmatory methods for the detection of veterinary drug residues, 109
- NAFION**
- Evaluation of Nafion-Crystal Violet films for the construction of an optical relative humidity sensor, 1623
- NAPHTHA**
- Multivariate determination of several compositional parameters related to the content of hydrocarbon in naphtha by MIR spectroscopy, 1827
- NATURAL GAS**
- Determination of total mercury in hydrocarbons and natural gas condensate by atomic fluorescence spectrometry, 185
- NEAR-INFRARED REFLECTANCE SPECTROSCOPY**
- Development and validation of methods for the determination of miokamycin in various pharmaceutical preparations by use of near infrared reflectance spectroscopy, 1089
- Pruning neural network for architecture optimization applied to near-infrared reflectance spectroscopic measurements. Determination of the nitrogen content in wheat leaves, 1669
- NEAR-INFRARED SPECTROSCOPY**
- Measurement of the cumulative particle size distribution of microcrystalline cellulose using near infrared reflectance spectroscopy, 33
- Fundamental investigations on the near-infrared spectra of microbial biomass as applicable to bioprocess monitoring, 157
- A rapid quantitative assay of intact paracetamol tablets by reflectance near-infrared spectroscopy, 163
- Solid phase Fourier transform near infrared spectroscopy, 579
- Near infrared transmittance analysis for the assay of solid pharmaceutical dosage forms, 755
- Construction and transferability of a spectral library for the identification of common solvents by near-infrared transreflectance spectroscopy, 1197
- Classification of cultivation area of ginseng radix with NIR and Raman spectroscopy, 1223
- NEPHELOMETRY**
- Nephelometric determination of micro amounts of nucleic acids with protamine sulfate, 907
- NEURAL NETWORKS**
- Typification of vinegars from Jerez and Rioja using classical chemometric techniques and neural network methods, 547
- The detection of caffeine in a variety of beverages using Curie-point pyrolysis mass spectrometry and genetic programming, 1069
- Pruning neural network for architecture optimization applied to near-infrared reflectance spectroscopic measurements. Determination of the nitrogen content in wheat leaves, 1669
- NEUTRON ACTIVATION ANALYSIS**
- Determination of trace metal impurities in high purity silver by two step selective precipitation separation followed by neutron activation analysis, 15

- Determination of sulfur as an impurity in commercial C_{60} , fullerene soot and sublimed C_{60} polycrystals by INAA, 417
- Rapid determination of molybdate in natural waters by coprecipitation and neutron activation analysis, 421
- Determination of ^{129}I in seawater and some environmental materials by neutron activation analysis, 1109
- NICKEL**
- Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191
- Determination of ultra-trace amounts of cadmium, cobalt and nickel in sea-water by electrothermal atomic absorption spectrometry with on-line preconcentration, 1695
- NICOTINE**
- Flow injection Fourier transform infrared determination of nicotine in tobacco, 783
- NILE BLUE**
- Interaction of a novel red-region fluorescent probe, Nile Blue, with DNA and its application to nucleic acids assay, 901
- NITRATE**
- Development of a sensitive nitrate-selective electrode for on-site use in fresh waters, 877
- Field evaluation of a novel nitrate sensitive electrode in drainage waters from agricultural grassland, 1467
- NITRIC OXIDE**
- Optical biosensing of nitric oxide using the metalloprotein cytochrome c' , 129
- NITRITE**
- The use of nitrite ion in the chromatographic determination of large amounts of hypochlorite ion and of traces of chlorite and chlorate ions, 1439
- NITROGEN**
- Pruning neural network for architecture optimization applied to near-infrared reflectance spectroscopic measurements. Determination of the nitrogen content in wheat leaves, 1669
- NON-CHLORINATED SOLVENTS**
- Determination of total lipid using non-chlorinated solvents, 1711
- NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY**
- Determination of phenol in phenol tars from the cumene-to-phenol process streams with ^{13}C -NMR spectroscopy, 1823
- NUCLEAR WASTE**
- Separation-optimized sequential injection method for rapid automated analytical separation of ^{90}Sr in nuclear waste, 203
- Automated extraction chromatographic separations of actinides using separation-optimized sequential injection techniques, 1143
- NUCLEIC ACID**
- Development of chemiluminescent biosensing of nucleic acids based on oligonucleotide-immobilized gold surfaces, 533
- Nephelometric determination of micro amounts of nucleic acids with protamine sulfate, 907
- High density oligonucleotide and DNA probe arrays for the analysis of target DNA, 1133
- OIL**
- Determination of polyaromatic hydrocarbons and some related compounds in industrial waste oils by GPC-HPLC-UV, 67
- The use of emulsions for the determination of methylmercury and inorganic mercury in fish-eggs oil by cold vapor generation in a flow injection system with atomic absorption spectrometric detection, 593
- OLIGONUCLEOTIDES**
- Simultaneous determination of guanine and adenine contents in DNA, RNA and synthetic oligonucleotides using a chemically modified electrode, 679
- OLIVE OIL**
- Evaluation of the 'antioxidant power' of olive oils based on a FIA system with amperometric detection, 1115
- OPTICAL SENSOR**
- Development of novel thermochromic plastic films for optical temperature sensing, 685
- Linear calibration function of luminescence quenching-based optical sensor for trace oxygen analysis, 695
- Response characteristics of optical sensors for oxygen: models based on a distribution in τ_0 or k_q , 1301
- Response characteristics of optical sensors for oxygen: a model based on a distribution in τ_0 and k_q , 1309
- Evaluation of Nafion-Crystal Violet films for the construction of an optical relative humidity sensor, 1623
- OPTODE**
- Novel chloride-selective optode based on polymer-stabilised emulsions doped with a lipophilic fluorescent polarity-sensitive dye, 1617
- ORGANIC PEROXIDES**
- On-line deoxygenation in reductive (and oxidative) amperometric detection: environmental applications in the liquid chromatography of organic peroxides, 1811
- ORGANIC POLLUTANTS**
- Identification of non-target compounds using gas chromatography with simultaneous atomic emission and mass spectrometric detection (GC-AED/MS): analysis of municipal wastewater, 1547
- ORGANIC SOLVENT**
- Determination of trace sulfur in organic compounds by activated Raney nickel desulfurization method with non-dispersive gas detection system, 767
- ORGANO-ARSENIC COMPOUNDS**
- Separation of microgram quantities of As(v), As(III) and organoarsenic species in aqueous solutions and determination by energy dispersive X-ray fluorescence spectrometry, 1105
- ORGANO-MONOLAYER FILMS**
- Apparent enhanced underpotential voltammetry of lead(II) at a spontaneously adsorbed monolayer-coated gold electrode, 1797
- ORGANOCHLORINES**
- Determination of organochlorine pesticide residues in foods using solid-phase extraction clean-up cartridges, 1287
- Removal of sulfur interfering in the analysis of organochlorines by GC-ECD, 1771
- ORGANOHALOGEN**
- A sampling device for collection and analysis of volatile halocarbons in coastal and oceanic waters, 1389
- ORGANOTIN**
- Artificial neural network approach to the evaluation of the coordination geometry in organotin(IV) compounds, 721
- Optimisation using experimental designs of the sample pretreatment: application to the control of the organotins in sewage sludge by GC-FPD, 1265
- OXYGEN**
- Effect of diffusion on measuring oxygen consumption in oxidation reactions with polarographic membrane-covered probe, 343
- The performance of oxygen sensing films with ruthenium-adsorbed fumed silica dispersed in silicone rubber, 691
- Linear calibration function of luminescence quenching-based optical sensor for trace oxygen analysis, 695
- Polarization-based oxygen sensor, 1041
- Response characteristics of optical sensors for oxygen: models based on a distribution in τ_0 or k_q , 1301
- Response characteristics of optical sensors for oxygen: a model based on a distribution in τ_0 and k_q , 1309
- Electropolymerised platinum porphyrin polymers for dissolved oxygen sensing, 1463
- OXYGEN SENSORS**
- Effect of diffusion on measuring oxygen consumption in oxidation reactions with polarographic membrane-covered probe, 343
- PARAQUAT**
- Development of an ELISA for paraquat: improvement of antibody characteristics by reversed affinity chromatography, 847
- PARTIAL LEAST-SQUARES**
- Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophotometry, 49
- Trace determination of phenol, bisphenol A and bisphenol A diglycidyl ether in mixtures by excitation fluorescence following micro liquid-liquid extraction using partial least squares regression, 385
- Wavelength selection by net analyte signals calculated with multivariate factor-based hybrid linear analysis (HLA). A theoretical and experimental comparison with partial least-squares (PLS), 725
- PARTICLE SIZE DISTRIBUTION**
- Measurement of the cumulative particle size distribution of microcrystalline cellulose using near infrared reflectance spectroscopy, 33
- PEFLOXACIN**
- Experimental design and multivariate calibration in the development, set-up and validation of a differential pulse polarographic and UV spectrophotometric method for the simultaneous plasmonic determination of the therapeutic metronidazole-pefloxacin combination, 1683
- PERMEABILITY**
- Simultaneous determination of changes in the permeability of two different liposomes mimicking bacterial and eukaryotic cell membranes using ion-selective electrodes, 883
- PEROXIDE**
- The spectrophotometric determination of hydroperoxide and peroxide in a lipid pharmaceutical product by flow injection analysis, 1865
- PERVAPORATION**
- Determination of formaldehyde in liquid, solid and semisolid pharmaceuticals and cosmetics by flow injection-pervaporation, 1119
- PESTICIDE**
- Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophotometry, 49
- Surface partitioning studies of *N*-methylcarbamate-treated post-harvest crops using SFE-HPLC-postcolumn reaction-fluorescence, 275
- Simultaneous determination of the pesticide naptalam and its metabolites in natural water by Fourier transform infrared spectrometry, 367
- Determination of organochlorine pesticide residues in honey, applying solid phase extraction with RP-C18 material, 473
- Guidelines for in-house validation of analytical methods for pesticide residues in food and animal feeds, 953
- Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159
- Determination of organochlorine pesticide residues in foods using solid-phase extraction clean-up cartridges, 1287

PETHIDINE

Solid-phase microextraction for the determination of pethidine and methadone in human urine using gas chromatography with nitrogen-phosphorus detection, 1283

PETROLEUM

Determination of methylcyclopentadienylmanganese tricarbonyl (MMT) in aqueous samples by SPME-GC-AED, 71

Determination of trace sulfur in organic compounds by activated Raney nickel desulfurization method with non-dispersive gas detection system, 767

PH

Static and time-resolved fluorescence of fluorescein-labeled dextran dissolved in aqueous solution or sequestered within a sol-gel-derived hydrogel, 373

PH INDICATORS

Development of novel thermochromic plastic films for optical temperature sensing, 685

PHARMACEUTICAL

Measurement of the cumulative particle size distribution of microcrystalline cellulose using near infrared reflectance spectroscopy, 33

Direct qualitative and quantitative characterization of a radiosensitizer, 5-iodo-2'-deoxyuridine within biodegradable polymeric microspheres by FT-Raman spectroscopy, 37

Effect of cooking on veterinary drug residues in food. Part 9. Nitroimidazoles, 289

Flow injection analysis-direct chemiluminescence determination of ergonovine maleate enhanced by hexadecylpyridinium chloride, 413

Wavelength selection by net analyte signals calculated with multivariate factor-based hybrid linear analysis (HLA). A theoretical and experimental comparison with partial least-squares (PLS), 725

Near infrared transmittance analysis for the assay of solid pharmaceutical dosage forms, 755

Analysis of tricyclic antidepressants using electrogenerated chemiluminescence, 759

Flow-injection chemiluminescence determination of isoniazid using on-line electrogenerated BrO^- as an oxidant, 763

Determination of trace sulfur in organic compounds by activated Raney nickel desulfurization method with non-dispersive gas detection system, 767

Novel spectrofluorimetric method for the determination of thiamine with iron(III) tetrasulfonatophthalocyanine as a catalyst, 771

Kinetic spectrophotometric determination of hydrocortisone acetate in a pharmaceutical preparation by use of partial least-squares regression, 911

Sequential injection technique for automated titration:

Spectrophotometric assay of vitamin C in pharmaceutical products using cerium(IV) in sulfuric acid, 917

Development and validation of methods for the determination of miokamycin in various pharmaceutical preparations by use of near infrared reflectance spectroscopy, 1089

Determination of formaldehyde in liquid, solid and semisolid pharmaceuticals and cosmetics by flow injection-pervaporation, 1119

Construction and transferability of a spectral library for the identification of common solvents by near-infrared transmittance spectroscopy, 1197

An HPLC assay for the determination of ketocanazole in common pharmaceutical preparations, 1589

Complexation study of diclofenac with β -cyclodextrin and spectrofluorimetric determination, 1833

The spectrophotometric determination of hydroperoxide and peroxide in a lipid pharmaceutical product by flow injection analysis, 1865

PHARMACOLOGY

Chiral determination of various adrenergic drugs by thin-layer chromatography using molecularly imprinted chiral stationary phases prepared with α -agonists, 1003

PHENOL

Trace determination of phenol, bisphenol A and bisphenol A diglycidyl ether in mixtures by excitation fluorescence following micro liquid-liquid extraction using partial least squares regression, 385

Development of a cellobiose dehydrogenase modified electrode for amperometric detection of diphenols, 527

Determination of phenol in phenol tars from the cumene-to-phenol process streams with ^{13}C -NMR spectroscopy, 1823

PHOSPHATE

Study of the stability of extractable phosphate content in a candidate reference material using a modified Williams extraction procedure, 407

PHOSPHORIMETRY

Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thibendazole in waters by transmitted solid phase spectrophosphorimetry, 49

PHOTOACOUSTIC SPECTROSCOPY

A flexible method of carbonate determination using an automatic gas analyzer equipped with an FTIR photoacoustic measurement chamber, 361

Photoacoustic thermal characterization of kaolinite clays, 1209

PHOTOTHERMAL

Photoacoustic thermal characterization of kaolinite clays, 1209

PHYTIC ACID

Fluorimetric determination of phytic acid based on the activation of the oxidation of 2,2'-dipyridyl ketone hydrazone catalysed by Cu(II) , 897

PIEZOELECTRIC DETECTION

Oxidation of dimethyl sulfide to dimethyl sulfoxide in liquefied petroleum gas prior to piezoelectric crystal detection, 153

Detection of lead(II) and silver(I) in aqueous solution using a piezoelectric device, 859

PIEZOELECTRIC SENSOR

Construction and analytical application of ion-selective piezoelectric sensor for atropine sulfate, 1629

Calixarene-coated piezoelectric quartz crystal sensor for the detection of organic amine in liquids, 1787

PIEZOELECTRICITY

Preparation and application of a trimethoprim ion-selective piezoelectric sensor, 91

PIGMENT

Minium; FT-Raman non-destructive analysis applied to an historical controversy, 1323

PLANT MATERIAL

Classical wet ashing *versus* microwave-assisted attacks for the determination of chromium in plants, 1

An analytical method for the detection of methylantimony species in environmental matrices: methylantimony levels in some UK plant material, 1243

Characterisation and determination of phytochelatin in plant extracts by electrospray tandem mass spectrometry, 1425

PLASMA

Determination of methylcyclopentadienylmanganese tricarbonyl (MMT) in aqueous samples by SPME-GC-AED, 71

Determination of copper and zinc in blood plasma by ion chromatography using a cobalt internal standard, 245

Determination of vitamins D_2 , D_3 , K_1 and K_2 and some hydroxy metabolites of vitamin D_3 in plasma using a continuous clean-up-preconcentration procedure coupled on-line with liquid chromatography-UV detection, 401

Simultaneous determination of inulin and *p*-aminohippuric acid (PAH) in human plasma and urine by high-performance liquid chromatography, 833

Sensitive gas chromatographic-mass spectrometric method for the determination of gacyclidine in rat plasma and spinal cord dialyzates, 1761

PLATINUM

Quantification of Pt bound to DNA using total-reflection X-ray fluorescence (TXRF), 583

PLATINUM MICROELECTRODES

Amperometric end-point detection of complexometric titrations with platinum microelectrodes, 1059

PLUTONIUM

Rapid separation of uranium and plutonium by extraction chromatography for determination by thermal ionisation mass spectrometry, 263

POLAROGRAPHY

Effect of diffusion on measuring oxygen consumption in oxidation reactions with polarographic membrane-covered probe, 343

POLLUTION

Laser photoacoustic spectrometry and its application for simulation of air pollution in a wind tunnel, 1205

POLY(ETHYLENE)

A rapid ultrasonic extraction technique to identify and quantify additives in poly(ethylene), 797

POLYCHLORINATED BIPHENYLS

The determination of polychlorinated biphenyls in municipal sewage sludges using microwave-assisted extraction and gas chromatography-mass spectrometry, 453

POLYCHLORINATED DIBENZOFURANS

Application of cloud-point methodology to the determination of polychlorinated dibenzofurans in sea water by high-performance liquid chromatography, 487

Pressurised hot water/steam extraction of polychlorinated dibenzofurans and naphthalenes from industrial soil, 1351

POLYCHLORINATED NAPHTHALENES

Pressurised hot water/steam extraction of polychlorinated dibenzofurans and naphthalenes from industrial soil, 1351

POLYCYCLIC AROMATIC HYDROCARBONS

Influence of sediment grain size on the efficiency of focused microwave extraction of polycyclic aromatic hydrocarbons, 5

Determination of polyaromatic hydrocarbons and some related compounds in industrial waste oils by GPC-HPLC-UV, 67

Evaluation of on-line methodology for microwave-assisted extraction of polycyclic aromatic hydrocarbons (PAHs) from sediment samples, 1361

Isolation and identification of fluoranthene biodegradation products, 1765

POLYMER

Direct qualitative and quantitative characterization of a radiosensitizer, 5-iodo-2'-deoxyuridine within biodegradable polymeric microspheres by FT-Raman spectroscopy, 37

Electrofunctional polymers: their role in the development of new analytical systems, 213

- Theory of analyte extraction by selected porous polymer SPME fibres, 643
- Self-gelatinizable graft copolymer of poly(vinyl alcohol) with 4-vinylpyridine as an immobilization matrix for the construction of a tyrosinase-based amperometric biosensor, 699
- Separation and characterisation of phenol-formaldehyde (resol) prepolymers using packed-column supercritical fluid chromatography with APCI mass spectrometric detection, 993
- XPS characterization of nanosized overoxidized polypyrrole films on graphite electrodes, 1215
- Electropolymerised platinum porphyrin polymers for dissolved oxygen sensing, 1463
- Voltammetric determination of trace mercury in concentrated chloride media using polymer-film electrodes modified with polyammonium macrocyclic receptors, 1661
- A simple solvent selection method for accelerated solvent extraction of additives from polymers, 1707
- Amberlite XAD-2 functionalized with chromotropic acid: synthesis of a new polymer matrix and its applications in metal ion enrichment for their determination by flame atomic absorption spectrometry, 1847
- POLYMERIC SORBENTS**
Adsorption of water vapour in the solid sorbents used for the sampling of volatile organic compounds, 1553
- POLYPROPYLENE**
Comparison of pressurised fluid extraction and microwave assisted extraction with atmospheric pressure methods for extraction of additives from polypropylene, 397
- POLYTYRAMINE MEMBRANE**
A sulfite biosensor fabricated using electrodeposited polytyramine: application to wine analysis, 1775
- POLYURETHANE**
Selectivity enhancement in spectrophotometry: on-line interference suppression using polyurethane foam minicolumn for aluminum determination with Methyl Thymol Blue, 805
- POTASSIUM**
Perfluorocarboxylic acid counter ion enhanced extraction of aqueous alkali metal ions with supercritical carbon dioxide, 1507
- POTENTIOMETRY**
Determination of Cl^- , Br^- , I^- , Mn^{2+} , malonic acid and quercetin by perturbation of a non-equilibrium stationary state in the Bray-Liebhafsky reaction, 147
- Composition of sodium taurocholate micellar solutions, 887
- Porphyrins as carriers in poly(vinyl chloride)-based membrane potentiometric sensors for histamine, 1319
- PRECIOUS METAL**
Analytical techniques for the determination of precious metals in geological and related materials, 1531
- PRECONCENTRATION**
Membrane solubilization with tetramethylammonium hydroxide for the preconcentration and electrothermal atomic absorption spectrometric determination of trace amounts of arsenic in water, 23
- Simultaneous determination of *cis*- and *trans*-resveratrol in wines by capillary zone electrophoresis, 61
- Electrofunctional polymers: their role in the development of new analytical systems, 213
- Determination of vitamins D_2 , D_3 , K_1 and K_2 and some hydroxy metabolites of vitamin D_3 in plasma using a continuous clean-up-preconcentration procedure coupled on-line with liquid chromatography-UV detection, 401
- Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345
- Sorption-catalytic testing of copper on a paper-based sorbent with attached alkylamino groups, 1523
- PRINCIPAL COMPONENT ANALYSIS**
Determination of the arabica/robusta composition of roasted coffee according to their sterolic content, 999
- Avoiding overfitting in the analysis of high-dimensional data with artificial neural networks (ANNs), 1675
- PROCESS ANALYSIS**
A robust multisyringe system for process flow analysis Part I. On-line dilution and single point titration of protolutes, 1373
- Determination of phenol in phenol tars from the cumene-to-phenol process streams with ^{13}C -NMR spectroscopy, 1823
- PROGESTERONE**
Reactivity of an immobilized anti-progesterone antiserum with homologous and heterologous progesterone-horseradish peroxidase conjugates, 313
- PROTEIN**
A model of thermally generated pH gradients in tapered capillaries, 335
- ^{203}Hg labelled PHMB as reagent for the determination of -SH groups in native and denatured proteins by hydrophobic interaction chromatography, 511
- Enhanced microdialysis recovery of some tricyclic antidepressants and structurally related drugs by cyclodextrin-mediated transport, 1027
- Determination of protein based on absorbance decrease of molybdenum(vi) complex with 2,6,7-trihydroxy-9-(4'-chlorophenyl)-3H-xanthen-3-one, 1093
- PYROLYSIS**
Studies of organic residues from ancient Egyptian mummies using high temperature-gas chromatography-mass spectrometry and sequential thermal desorption-gas chromatography-mass spectrometry, 443
- Characterization of within-tree variation of lignin components in *Eucalyptus camaldulensis* by pyrolysis-gas chromatography, 669
- QUALITY CONTROL**
Accuracy in naturally occurring anabolic steroid assays in cattle and first approach to quality control in Italy, 307
- Getting more from your laboratory control charts, 433
- QUARTZ CRYSTAL**
Calixarene-coated piezoelectric quartz crystal sensor for the detection of organic amine in liquids, 1787
- QUARTZ CRYSTAL MICROBALANCE**
Mapping of chemical functionality using an array of quartz crystal microbalances in conjunction with Kohonen self-organizing maps, 851
- Detection of lead(ii) and silver(i) in aqueous solution using a piezoelectric device, 859
- RADIONUCLIDES**
The measurement of ^{36}Cl and ^{129}I in concrete wastes, 627
- Effect of sample drying and storage time on the extraction of fallout $^{239+240}\text{Pu}$, ^{137}Cs and natural ^{210}Pb as well as of stable Cs, Pb and Mn from soils, 1383
- RAMAN SPECTROSCOPY**
Direct qualitative and quantitative characterization of a radiosensitizer, 5-iodo-2'-deoxyuridine within biodegradable polymeric microspheres by FT-Raman spectroscopy, 37
- Classification of cultivation area of ginseng radix with NIR and Raman spectroscopy, 1223
- Minimum; FT-Raman non-destructive analysis applied to an historical controversy, 1323
- Quantitative FT-Raman spectroscopy to measure wood cell dimensions, 1477
- Quantitative analysis of the Raman spectra of mixtures of weakly interacting components by factor analysis methods, 1481
- Monitoring of the acid catalysed esterification of ethanol by acetic acid using Raman spectroscopy, 1817
- RARE EARTH ELEMENTS**
Preconcentration of ultratrace rare earth elements in seawater with 8-hydroxyquinoline immobilized polyacrylonitrile hollow fiber membrane for determination by inductively coupled plasma mass spectrometry, 621
- Liquid chromatographic selectivity and retention behavior of rare-earth elements on a chelating resin having a propylenediaminetetraacetate type functional group, 1595
- RAT**
Speciation of metabolites of selenate in rats by HPLC-ICP-MS, 1237
- REAGENT**
Comparison of four fluorescence Edman reagents with benzofurazan structure for the detection of thiazolinone amino acid derivatives, 43
- REFERENCE MATERIAL**
Determination of total tin in sediment reference materials by isotope dilution inductively coupled plasma mass spectrometry after alkali fusion, 257
- Study of the stability of extractable phosphate content in a candidate reference material using a modified Williams extraction procedure, 407
- REFLECTANCE**
A rapid quantitative assay of intact paracetamol tablets by reflectance near-infrared spectroscopy, 163
- REFLECTANCE SPECTROMETRY**
Classification of cultivation area of ginseng radix with NIR and Raman spectroscopy, 1223
- REFRACTIVE INDEX**
Universal detection in capillary electrophoresis with a micro-interferometric backscatter detector, 221
- RELATIVE HUMIDITY**
Evaluation of Nafion-Crystal Violet films for the construction of an optical relative humidity sensor, 1623
- RESVERATROL**
Simultaneous determination of *cis*- and *trans*-resveratrol in wines by capillary zone electrophoresis, 61
- REVIEW**
Electrofunctional polymers: their role in the development of new analytical systems, 213
- Getting more from your laboratory control charts, 433
- Theoretical considerations of chemical reactions in micro-reactors operating under electroosmotic and electrophoretic control, 1273
- Acoustic waves and the study of biochemical macromolecules and cells at the sensor-liquid interface, 1405
- Analytical techniques for the determination of precious metals in geological and related materials, 1531
- RICE**
Elemental content of Vietnamese rice. Part 1. Sampling, analysis and comparison with previous studies, 553
- Elemental content of Vietnamese rice. Part 2. Multivariate analysis, 561

RNA

Simultaneous determination of guanine and adenine contents in DNA, RNA and synthetic oligonucleotides using a chemically modified electrode, 679

ROBOTICS

Fully automated determination of vitamins A and E in milk-based products using a robotic station-HPLC arrangement, 801

RUTHENIUM

The performance of oxygen sensing films with ruthenium-adsorbed fumed silica dispersed in silicone rubber, 691

SAMPLE HANDLING

Relationship between sample mass and number of particles for two-component particulate mixtures, 945

Effect of sample drying and storage time on the extraction of fallout $^{239+240}\text{Pu}$, ^{137}Cs and natural ^{210}Pb as well as of stable Cs, Pb and Mn from soils, 1383

Synthetic reference sampling target for the estimation of measurement uncertainty, 1701

SAMPLE PREPARATION

Classical wet ashing *versus* microwave-assisted attacks for the determination of chromium in plants, 1

Effect of sample drying and storage time on the extraction of fallout $^{239+240}\text{Pu}$, ^{137}Cs and natural ^{210}Pb as well as of stable Cs, Pb and Mn from soils, 1383

SAMPLING

Elemental content of Vietnamese rice. Part 1. Sampling, analysis and comparison with previous studies, 553

Sampling of diisocyanates (HDI, TDI) in air by derivatisation with secondary amines as reagents. Part 1. Partial rate factors (PRF) of reagents, 933

A sampling device for collection and analysis of volatile halocarbons in coastal and oceanic waters, 1389

Computer simulation of active air sampling for volatile organic compound analysis, 1395

SEA-WATER

Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191

Application of cloud-point methodology to the determination of polychlorinated dibenzofurans in sea water by high-performance liquid chromatography, 487

Preconcentration of ultratrace rare earth elements in seawater with 8-hydroxyquinoline immobilized polyacrylonitrile hollow fiber membrane for determination by inductively coupled plasma mass spectrometry, 621

Determination of ^{129}I in seawater and some environmental materials by neutron activation analysis, 1109

Determination of ultra-trace amounts of cadmium, cobalt and nickel in sea-water by electrothermal atomic absorption spectrometry with on-line preconcentration, 1695

SECONDARY AMINES

Sampling of diisocyanates (HDI, TDI) in air by derivatisation with secondary amines as reagents. Part 1. Partial rate factors (PRF) of reagents, 933

SEDIMENTS

Influence of sediment grain size on the efficiency of focused microwave extraction of polycyclic aromatic hydrocarbons, 5

Determination of total tin in sediment reference materials by isotope dilution inductively coupled plasma mass spectrometry after alkali fusion, 257

Study of the stability of extractable phosphate content in a candidate reference material using a modified Williams extraction procedure, 407

Evaluation of on-line methodology for microwave-assisted extraction of polycyclic aromatic hydrocarbons (PAHs) from sediment samples, 1361

SEGMENTED FLOW INJECTION

Total cyanide determination by a segmented flow injection-on-line UV digestion-amperometric method, 1255

SELENIUM

Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75

Fractionation of soluble selenium compounds from fish using size-exclusion chromatography with on-line detection by inductively coupled plasma mass spectrometry, 1435

Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749

Redoxspeciation of selenium in water samples by cathodic stripping voltammetry using an automated flow system, 1803

SELENOPROTEIN P

Incorporation of selenium into selenoprotein P and extracellular glutathione peroxidase: HPLC-ICPMS data with enriched selenite, 1749

SELF-ORGANIZING MAPS

Mapping of chemical functionality using an array of quartz crystal microbalances in conjunction with Kohonen self-organizing maps, 851

SENSOR

Preparation and application of a trimethoprim ion-selective piezoelectric sensor, 91

Construction and evaluation of ion selective electrodes for perchlorate with a summing operational amplifier: application to pyrotechnics mixtures analysis, 97

Optical biosensing of nitric oxide using the metalloprotein cytochrome c' , 129

Electrofunctional polymers: their role in the development of new analytical systems, 213

Conductimetric sensor for atrazine detection based on molecularly imprinted polymer membranes, 331

Flow probe for *in situ* electrochemical monitoring of trace chromium, 349

Static and time-resolved fluorescence of fluorescein-labeled dextran dissolved in aqueous solution or sequestered within a sol-gel-derived hydrogel, 373

Anion-sensitive field-effect transistors based on sol-gel-derived membranes incorporating quaternary ammonium salts, 517

The performance of oxygen sensing films with ruthenium-adsorbed fumed silica dispersed in silicone rubber, 691

Mapping of chemical functionality using an array of quartz crystal microbalances in conjunction with Kohonen self-organizing maps, 851

Amperometric detection of gaseous ethanol and acetaldehyde at low concentrations on an Au-Nafion electrode, 871

Polarization-based oxygen sensor, 1041

Multivariate standardization techniques on ion-selective sensor arrays, 1045

Discrimination of diesel fuels with chemical sensors and mass spectrometry based electronic noses, 1167

Experimental demonstration and simulation of electrochemical non-linear responses to glucose and its interferents with an amperometric sensor, 1175

Porphyrins as carriers in poly(vinyl chloride)-based membrane potentiometric sensors for histamine, 1319

Acoustic waves and the study of biochemical macromolecules and cells at the sensor-liquid interface, 1405

Electropolymerised platinum porphyrin polymers for dissolved oxygen sensing, 1463

Novel chloride-selective optode based on polymer-stabilised emulsions doped with a lipophilic fluorescent polarity-sensitive dye, 1617

Study of a molecular imprinting polymer coated BAW bio-mimic sensor and its application to the determination of caffeine in human serum and urine, 1781

SEQUENTIAL EXTRACTION

Effect of sample drying and storage time on the extraction of fallout $^{239+240}\text{Pu}$, ^{137}Cs and natural ^{210}Pb as well as of stable Cs, Pb and Mn from soils, 1383

SEQUENTIAL INJECTION

Separation-optimized sequential injection method for rapid automated analytical separation of ^{90}Sr in nuclear waste, 203

Sequential injection technique for automated titration:

Spectrophotometric assay of vitamin C in pharmaceutical products using cerium(IV) in sulfuric acid, 917

Automated extraction chromatographic separations of actinides using separation-optimized sequential injection techniques, 1143

SERUM

On-line dialysis-SPE-CE of acidic drugs in biological samples, 115

Study of a molecular imprinting polymer coated BAW bio-mimic sensor and its application to the determination of caffeine in human serum and urine, 1781

SEWAGE SLUDGE

The determination of polychlorinated biphenyls in municipal sewage sludges using microwave-assisted extraction and gas chromatography-mass spectrometry, 453

Optimisation using experimental designs of the sample pretreatment: application to the control of the organoins in sewage sludge by GC-FPD, 1265

SIGNAL PROCESSING

Electroanalytical signal processing method based on B-spline wavelets analysis, 739

SILVER

Determination of trace metal impurities in high purity silver by two step selective precipitation separation followed by neutron activation analysis, 15

Detection of lead(II) and silver(I) in aqueous solution using a piezoelectric device, 859

SIZE-EXCLUSION CHROMATOGRAPHY

Fractionation of soluble selenium compounds from fish using size-exclusion chromatography with on-line detection by inductively coupled plasma mass spectrometry, 1435

SODIUM

Perfluorocarboxylic acid counter ion enhanced extraction of aqueous alkali metal ions with supercritical carbon dioxide, 1507

SODIUM TAUROCHOLATE

Composition of sodium taurocholate micellar solutions, 887

SOIL

Infrared emission study of the thermal transformation mechanism of Al_{13} -pillared clay, 381

Spectrophotometric determination of lead with *N*-hydroxy-*N,N'*-diphenylbenzidine and diphenylcarbazone in airborne dust particulates and soil, 1331

- Pressurised hot water/steam extraction of polychlorinated dibenzofurans and naphthalenes from industrial soil, 1351
- Effect of sample drying and storage time on the extraction of fallout $^{239+240}\text{Pu}$, ^{137}Cs and natural ^{210}Pb as well as of stable Cs, Pb and Mn from soils, 1383
- A new purge-and-membrane mass spectrometric (PAM-MS) instrument for analysis of volatile organic compounds in soil samples, 1421
- The use of microwaves in the acceleration of digestion and colour development in the determination of total Kjeldahl nitrogen in soil, 1719
- SOL-GEL**
- Anion-sensitive field-effect transistors based on sol-gel-derived membranes incorporating quaternary ammonium salts, 517
- SOLID PHASE EXTRACTION**
- Rapid preconcentration method for the determination of azadirachtin-A and -B, nimbin and salannin in neem oil samples by using graphitised carbon solid phase extraction, 19
- Determination of methylcyclopentadienylmanganese tricarbonyl (MMT) in aqueous samples by SPME-GC-AED, 71
- Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75
- On-line dialysis-SPE-CE of acidic drugs in biological samples, 115
- Methodology for assessing the properties of molecular imprinted polymers for solid phase extraction, 467
- Determination of organochlorine pesticide residues in honey, applying solid phase extraction with RP-C18 material, 473
- Urine polyamines determination using dansyl chloride derivatization in solid-phase extraction cartridges and HPLC, 477
- Solid phase Fourier transform near infrared spectroscopy, 579
- In-tube solid phase micro-extraction-gas chromatography of volatile compounds in aqueous solution, 651
- Flow analysis of micro amounts of chromium(III) and (VI) in natural water by solid phase spectrophotometry using diphenylcarbazide, 787
- A method for the separation of residues of nine compounds in cattle liver related to treatment with oxfendazole, 1023
- Determination of organochlorine pesticide residues in foods using solid-phase extraction clean-up cartridges, 1287
- A transparent membrane filter for the solid-phase spectrophotometric determination of trace cationic surfactant in water, 1489
- Determination of carphedon in human urine by solid-phase microextraction using capillary gas chromatography with nitrogen-phosphorus detection, 1559
- SOLID PHASE MICROEXTRACTION**
- Headspace solid-phase microextraction for the determination of trace levels of taste and odor compounds in water samples, 459
- Theory of analyte extraction by selected porous polymer SPME fibres, 643
- Solid-phase microextraction for the determination of pethidine and methadone in human urine using gas chromatography with nitrogen-phosphorus detection, 1283
- Determination of equilibrium constant of alkylbenzenes binding to bovine serum albumin by solid phase microextraction, 1443
- SOLUTE SELECTIVITY**
- The effect of temperature and the composition of non-associating binary solvent mixtures on solute selectivity in liquid chromatography, 1745
- SOLVENT**
- Optimum operating conditions for chiral separations in liquid chromatography, 713
- Recovery of some common solvents from protective clothing breakthrough indicator pads by microwave-solvent extraction and gas chromatography, 941
- Construction and transferability of a spectral library for the identification of common solvents by near-infrared transreflectance spectroscopy, 1197
- SOLVENT EXTRACTION**
- Recovery of some common solvents from protective clothing breakthrough indicator pads by microwave-solvent extraction and gas chromatography, 941
- A simple solvent selection method for accelerated solvent extraction of additives from polymers, 1707
- Determination of total lipid using non-chlorinated solvents, 1711
- SPECIATION**
- Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75
- Separation of microgram quantities of As(V), As(III) and organoarsenic species in aqueous solutions and determination by energy dispersive X-ray fluorescence spectrometry, 1105
- Speciation of metabolites of selenate in rats by HPLC-ICP-MS, 1237
- SPECTRAL LIBRARY**
- Construction and transferability of a spectral library for the identification of common solvents by near-infrared transreflectance spectroscopy, 1197
- SPECTROFLUORIMETRY**
- Highly sensitive spectrofluorimetric determination of hydrogen peroxide with β -cyclodextrin-hemin as catalyst, 173
- Spectrofluorimetric determination of piroxicam in the presence and absence of β -cyclodextrin, 587
- Kinetic analysis of consecutive reactions using a non-linear least-squares error-compensation algorithm, 751
- Novel spectrofluorimetric method for the determination of thiamine with iron(III) tetrasulfonatophthalocyanine as a catalyst, 771
- Fluorimetric determination of phytic acid based on the activation of the oxidation of 2,2'-dipyridyl ketone hydrazone catalysed by Cu(II), 897
- Interaction of a novel red-region fluorescent probe, Nile Blue, with DNA and its application to nucleic acids assay, 901
- Complexation study of diclofenac with β -cyclodextrin and spectrofluorimetric determination, 1833
- SPECTROMETRY**
- Determination of bismuth in aluminium and in steels by electrothermal atomic absorption spectrometry after on-line separation using a minicolumn of activated carbon, 1249
- SPECTROPHOTOMETRY**
- Comparison of four fluorescence Edman reagents with benzofurazan structure for the detection of thiazolinone amino acid derivatives, 43
- Rapid automated spectrophotometric competitive complexation studies of drugs with cyclodextrins using the flow injection gradient technique: tricyclic antidepressant drugs with α -cyclodextrin, 391
- A comparison of chemometric methods for the flow injection simultaneous spectrophotometric determination of aniline and cyclohexylamine, 745
- Flow analysis of micro amounts of chromium(III) and (VI) in natural water by solid phase spectrophotometry using diphenylcarbazide, 787
- A rapid ultrasonic extraction technique to identify and quantify additives in poly(ethylene), 797
- Selectivity enhancement in spectrophotometry: on-line interference suppression using polyurethane foam minicolumn for aluminum determination with Methyl Thymol Blue, 805
- Determination of malondialdehyde in traditional fish products by HPLC, 843
- Kinetic spectrophotometric determination of hydrocortisone acetate in a pharmaceutical preparation by use of partial least-squares regression, 911
- Sequential injection technique for automated titration: Spectrophotometric assay of vitamin C in pharmaceutical products using cerium(IV) in sulfuric acid, 917
- Determination of protein based on absorbance decrease of molybdenum(VI) complex with 2,6,7-trihydroxy-9-(4'-chlorophenyl)-3H-xanthen-3-one, 1093
- Uncertainty of measurement in spectrophotometric analysis: A case study, 1099
- Determination of formaldehyde in liquid, solid and semisolid pharmaceuticals and cosmetics by flow injection-pervaporation, 1119
- Synthesis of meso-tetra-(3,5-dibromo-4-hydroxyphenyl)-porphyrin and its application to second-derivative spectrophotometric determination of lead in clinical samples, 1227
- Spectrophotometric determination of lead with N-hydroxy-N,N'-diphenylbenzamide and diphenylcarbazone in airborne dust particulates and soil, 1331
- A transparent membrane filter for the solid-phase spectrophotometric determination of trace cationic surfactant in water, 1489
- An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727
- Synthesis of 2-hydroxy-3-carboxyl-5-sulfonicarsenazo and its application to the spectrophotometric determination of thorium, 1839
- Determination of active chlorine in air by bonded phase sorbent collection and spectrophotometric analysis, 1853
- The spectrophotometric determination of hydroperoxide and peroxide in a lipid pharmaceutical product by flow injection analysis, 1865
- SPECTROSCOPY**
- A flexible method of carbonate determination using an automatic gas analyzer equipped with an FTIR photoacoustic measurement chamber, 361
- SPECTRUM ANALYSIS**
- Wavelet frequency spectrum analysis of oscillograms, 893
- STATISTICS**
- Getting more from your laboratory control charts, 433
- A top-down in-house validation based approach for the investigation of the measurement uncertainty using fractional factorial experiments, 537
- A natural history of analytical methods, 991
- Uncertainty of measurement in spectrophotometric analysis: A case study, 1099
- Optimisation using experimental designs of the sample pretreatment: application to the control of the organotins in sewage sludge by GC-FPD, 1265
- STEELS**
- Determination of bismuth in aluminium and in steels by electrothermal atomic absorption spectrometry after on-line separation using a minicolumn of activated carbon, 1249
- STEROID**
- Accuracy in naturally occurring anabolic steroid assays in cattle and first approach to quality control in Italy, 307
- Determination of testosterone:epitestosterone ratio after pentafluorophenyl dimethylsilyl-trimethylsilyl derivatisation using gas chromatography-mass spectrometry in equine urine, 675
- GC-MS determination of steroids related to androgen biosynthesis in human hair with pentafluorophenyl dimethylsilyl-trimethylsilyl derivatisation, 1297

STRIPPING VOLTAMMETRY

Redoxspeciation of selenium in water samples by cathodic stripping voltammetry using an automated flow system, 1803

STRONTIUM

Separation-optimized sequential injection method for rapid automated analytical separation of ^{90}Sr in nuclear waste, 203

SULFAMETHAZINE

Production and characterization of polyclonal antibodies to sulfamethazine and their potential use in immunoaffinity chromatography for urine sample pre-treatment, 1569

SULFITE

A sulfite biosensor fabricated using electrodeposited polytyramine: application to wine analysis, 1775

SULFUR

Determination of sulfur as an impurity in commercial C_{60} , fullerene soot and sublimed C_{60} polycrystals by INAA, 417

Determination of trace sulfur in organic compounds by activated Raney nickel desulfurization method with non-dispersive gas detection system, 767

Removal of sulfur interfering in the analysis of organochlorines by GC-ECD, 1771

SUPERCritical FLUID CHROMATOGRAPHY

Single-pump on-line parallel addition of modifier for packed column supercritical fluid chromatography, 503

The analysis of β -agonists by packed-column, 827

Separation and characterisation of phenol-formaldehyde (resol) prepolymers using packed-column supercritical fluid chromatography with APCI mass spectrometric detection, 993

Supercritical fluid extraction and chromatography of non-ionic surfactants combined with FTIR, APCI-MS and FID detection, 1501

SUPERCritical FLUID EXTRACTION

Surface partitioning studies of *N*-methylcarbamate-treated post-harvest crops using SFE-HPLC-postcolumn reaction-fluorescence, 275

A new and rapid method for the determination of nicarbazin residues in poultry feed, eggs and muscle tissue using supercritical fluid extraction and high performance liquid chromatography, 499

Extraction and recovery of metals using a supercritical fluid with chelating agents, 609

Supercritical fluid extraction (SFE) as a multi-residue extraction procedure for β -agonists in bovine liver tissue, 1355

Supercritical fluid extraction and chromatography of non-ionic surfactants combined with FTIR, APCI-MS and FID detection, 1501

Perfluorocarboxylic acid counter ion enhanced extraction of aqueous alkali metal ions with supercritical carbon dioxide, 1507

SUPPORTED LIQUID MEMBRANE

Ultrasonic extraction of hexavalent chromium in solid samples followed

by automated analysis using a combination of supported liquid membrane extraction and UV detection in a flow system, 1367

SURFACE ANALYSIS

Scanning Kelvin microprobe in the tandem analysis of surface topography and chemistry, 961

SURFACE CHEMISTRY

Scanning Kelvin microprobe in the tandem analysis of surface topography and chemistry, 961

SURFACE TOPOGRAPHY

Scanning Kelvin microprobe in the tandem analysis of surface topography and chemistry, 961

SURFACTANT

The use of emulsions for the determination of methylmercury and inorganic mercury in fish-eggs oil by cold vapor generation in a flow injection system with atomic absorption spectrometric detection, 593

A transparent membrane filter for the solid-phase spectrophotometric determination of trace cationic surfactant in water, 1489

Supercritical fluid extraction and chromatography of non-ionic surfactants combined with FTIR, APCI-MS and FID detection, 1501

TANDEM MASS SPECTROMETRY

Rapid screening of banknotes for the presence of controlled substances by thermal desorption atmospheric pressure chemical ionisation tandem mass spectrometry, 103

Detection of *N,N'*-diphenyl-*N,N'*-dimethylurea (methyl centralite) in gunshot residues using MS-MS method, 1563

TEA

Sono-cathodic stripping voltammetry of manganese at a polished boron-doped diamond electrode: application to the determination of manganese in instant tea, 1791

TEMPERATURE SENSING

Development of novel thermochromic plastic films for optical temperature sensing, 685

TERBIUM

Improved detection of salicylic acids using terbium-sensitized luminescence in aqueous micellar solutions of cetyltrimethylammonium chloride, 1075

TETRACYCLINES

Utilization of a scientifically operated charge-coupled device detector for high-performance thin-layer chromatographic analysis of tetracyclines, 1577

THALLIUM

A fast method for the simultaneous determination of ^{230}Th , ^{234}U and ^{235}U with isotope dilution sector field ICP-MS, 927

THERMAL IONIZATION MASS SPECTROMETRY

Rapid separation of uranium and plutonium by extraction chromatography for determination by thermal ionisation mass spectrometry, 263

THERMOCHROMIC PLASTIC FILMS

Development of novel thermochromic plastic films for optical temperature sensing, 685

THERMODYNAMICS

Determination of Cl^- , Br^- , I^- , Mn^{2+} , malonic acid and quercetin by perturbation of a non-equilibrium stationary state in the Bray-Liebhafsky reaction, 147

THIABENDAZOLE

Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophotometry, 49

THIAMINE

Novel spectrofluorimetric method for the determination of thiamine with iron(III) tetrasulfonatophthalocyanine as a catalyst, 771

THIN FILM

XPS characterization of nanosized overoxidized polypyrrole films on graphite electrodes, 1215

THIN LAYER CHROMATOGRAPHY

Determination of the arabica/robusta composition of roasted coffee according to their sterolic content, 999

Chiral determination of various adrenergic drugs by thin-layer chromatography using molecularly imprinted chiral stationary phases prepared with α -agonists, 1003

THORIUM

Determination of uranium and thorium in geological materials using extraction chromatography, 271

Synthesis of 2-hydroxy-3-carboxyl-5-sulfonarsenazo and its application to the spectrophotometric determination of thorium, 1839

TIN

Determination of total tin in sediment reference materials by isotope dilution inductively coupled plasma mass spectrometry after alkali fusion, 257

TITRIMETRY

Sequential injection technique for automated titration:

Spectrophotometric assay of vitamin C in pharmaceutical products using cerium(IV) in sulfuric acid, 917

A robust multisyringe system for process flow analysis. Part I. On-line dilution and single point titration of protolutes, 1373

An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727

TOBACCO

Flow injection Fourier transform infrared determination of nicotine in tobacco, 783

TOTAL REFLECTION X-RAY FLUORESCENCE**SPECTROSCOPY**

Pigment investigation of a late-medieval manuscript with total reflection X-ray fluorescence and micro-Raman spectroscopy, 169

Quantification of Pt bound to DNA using total-reflection X-ray fluorescence (TXRF), 583

TOXICOLOGY

Determination of low concentrations of potentially toxic elements in human liver from newborns and infants, 1337

Ammonium hydroxide pre-treatment as an aid to increasing extraction efficiencies of toxic metals from spent oxide waste, 1513

TRACE ANALYSIS

Automated trace enrichment for screening and/or determination of primary, secondary and tertiary amphetamines in biological samples by liquid chromatography, 239

Trace determination of phenol, bisphenol A and bisphenol A diglycidyl ether in mixtures by excitation fluorescence following micro

liquid-liquid extraction using partial least squares regression, 385

Headspace solid-phase microextraction for the determination of trace levels of taste and odor compounds in water samples, 459

Alkaline solubilization of biological materials for trace element analysis by electrothermal atomic absorption spectrometry, 1843

TRICYCLIC ANTIDEPRESSANTS

Analysis of tricyclic antidepressants using electrogenerated chemiluminescence, 759

TRIMETHOPRIM

Preparation and application of a trimethoprim ion-selective piezoelectric sensor, 91

TYROSINE BIOSENSOR

Self-gelatinizable graft copolymer of poly(vinyl alcohol) with 4-vinylpyridine as an immobilization matrix for the construction of a tyrosinase-based amperometric biosensor, 699

ULTRAMICROELECTRODES

Heterogeneous redox catalysis at conducting polymer ultramicroelectrodes, 1635

ULTRASONIC EXTRACTION

A rapid ultrasonic extraction technique to identify and quantify additives in poly(ethylene), 797

ULTRAVIOLET DIGESTION

Total cyanide determination by a segmented flow injection-on-line UV digestion-amperometric method, 1255

ULTRAVIOLET SPECTROPHOTOMETRY

Demonstration of isoelectric focusing on an etched quartz chip with UV absorption imaging detection, 637

ULTRAVIOLET SPECTROSCOPY

The analysis of β -agonists by packed-column, 827

ULTRAVIOLET-VISIBLE SPECTROPHOTOMETRY

Experimental design and multivariate calibration in the development, set-up and validation of a differential pulse polarographic and UV spectrophotometric method for the simultaneous plasmatic determination of the therapeutic metronidazole-pefloxacin combination, 1683

UNCERTAINTY

A top-down in-house validation based approach for the investigation of the measurement uncertainty using fractional factorial experiments, 537

Synthetic reference sampling target for the estimation of measurement uncertainty, 1701

UNDERPOTENTIAL VOLTAMMETRY

Apparent enhanced underpotential voltammetry of lead(II) at a spontaneously adsorbed monolayer-coated gold electrode, 1797

URANIUM

Rapid separation of uranium and plutonium by extraction chromatography for determination by thermal ionisation mass spectrometry, 263

Determination of uranium and thorium in geological materials using extraction chromatography, 271

A fast method for the simultaneous determination of ^{230}Th , ^{234}U and ^{235}U with isotope dilution sector field ICP-MS, 927

URINE

Optimizing the balance between false positive and false negative error probabilities of confirmatory methods for the detection of veterinary drug residues, 109

On-line dialysis-SPE-CE of acidic drugs in biological samples, 115

Urine polyamines determination using dansyl chloride derivatization in solid-phase extraction cartridges and HPLC, 477

Simultaneous determination of inulin and *p*-aminohippuric acid (PAH) in human plasma and urine by high-performance liquid chromatography, 833

Screen-printed amperometric biosensors for the rapid measurement of L- and D-amino acids, 865

Solid-phase microextraction for the determination of pethidine and methadone in human urine using gas chromatography with nitrogen-phosphorus detection, 1283

Study of a molecular imprinting polymer coated BAW bio-mimic sensor and its application to the determination of caffeine in human serum and urine, 1781

VALIDATION

A top-down in-house validation based approach for the investigation of the measurement uncertainty using fractional factorial experiments, 537

Measurement uncertainty: Approaches to the evaluation of uncertainties associated with recovery, 981

A program for the weighted linear least-squares regression of unbalanced response arrays, 1191

VEGETABLE

Multiresidue analysis of pesticides in vegetables and fruits using a high capacity absorbent polymer for water, 1159

VETERINARY

Bioassays for the detection of growth-promoting agents, veterinary drugs and environmental contaminants in food, 79

Immobilisation of thiabendazole specific antibodies on an agarose matrix for application in immunoaffinity chromatography, 87

Investigations by HPLC-electrospray mass spectrometry and NMR spectroscopy into the isomerisation of salinomycin, 251

Effect of cooking on veterinary drug residues in food. Part 9. Nitroimidazoles, 289

A study of the effect of individual feed constituents on the recovery of avoparcin from compound animal feedingstuffs, 949

A method for the separation of residues of nine compounds in cattle liver related to treatment with oxfendazole, 1023

Evaluation of an immunobiosensor for the on-site testing of veterinary drug residues at an abattoir. Screening for sulfamethazine in pigs, 1315

VINEGAR

Typification of vinegars from Jerez and Rioja using classical chemometric techniques and neural network methods, 547

VITAMIN C

Sequential injection technique for automated titration: Spectrophotometric assay of vitamin C in pharmaceutical products using cerium(IV) in sulfuric acid, 917

VITAMINS

Determination of vitamins D₂, D₃, K₁ and K₂ and some hydroxy metabolites of vitamin D₃ in plasma using a continuous clean-up-preconcentration procedure coupled on-line with liquid chromatography-UV detection, 401

Fully automated determination of vitamins A and E in milk-based products using a robotic station-HPLC arrangement, 801

VOLATILE ORGANIC COMPOUNDS

In-tube solid phase micro-extraction-gas chromatography of volatile compounds in aqueous solution, 651

Computer simulation of active air sampling for volatile organic compound analysis, 1395

A new purge-and-membrane mass spectrometric (PAM-MS) instrument for analysis of volatile organic compounds in soil samples, 1421

Adsorption of water vapour in the solid sorbents used for the sampling of volatile organic compounds, 1553

Evaluation of Carboxipack B adsorbent for the tube-type diffusive sampling of volatile organic compounds at ambient concentration, 1859

VOLATILE ORGANIC HALOCARBON COMPOUNDS

A sampling device for collection and analysis of volatile halocarbons in coastal and oceanic waters, 1389

VOLTAMMETRY

Flow probe for *in situ* electrochemical monitoring of trace chromium, 349

Multi-electrode detection in voltammetry. Part 3. Effects of array configuration on the Hadamard multiplexed voltammetric technique, 1657

Voltammetric determination of trace mercury in concentrated chloride media using polymer-film electrodes modified with polyammonium macrocyclic receptors, 1661

Apparent enhanced underpotential voltammetry of lead(II) at a spontaneously adsorbed monolayer-coated gold electrode, 1797

WASTE

Determination of polyaromatic hydrocarbons and some related compounds in industrial waste oils by GPC-HPLC-UV, 67

WATER

Membrane solubilization with tetramethylammonium hydroxide for the preconcentration and electrothermal atomic absorption spectrometric determination of trace amounts of arsenic in water, 23

Indirect determination of trace amounts of fluoride in natural waters by ion chromatography: a comparison of on-line post-column fluorimetry and ICP-MS detectors, 27

Application of partial least squares multivariate calibration for the determination of mixtures of carbaryl and thiabendazole in waters by transmitted solid phase spectrophosphorimetry, 49

Determination of methylcyclopentadienylmanganese tricarbonyl (MMT) in aqueous samples by SPME-GC-AED, 71

Use of solid phase extraction for speciation of selenium compounds in aqueous environmental samples, 75

Amperometric determination of the water content in acetone, butter and margarine using a wall-tube platinum microelectrode in a flow injection system, 143

Flow probe for *in situ* electrochemical monitoring of trace chromium, 349

Cathodic stripping voltammetric determination of ultratrace gold(III) at a bulk modified epoxy-graphite tube composite electrode in flow systems, 353

Simultaneous determination of the pesticide naptalam and its metabolites in natural water by Fourier transform infrared spectrometry, 367

Trace determination of phenol, bisphenol A and bisphenol A diglycidyl ether in mixtures by excitation fluorescence following micro liquid-liquid extraction using partial least squares regression, 385

Rapid determination of molybdate in natural waters by coprecipitation and neutron activation analysis, 421

Headspace solid-phase microextraction for the determination of trace levels of taste and odor compounds in water samples, 459

Ion chromatographic separation of common mono- and divalent cations on an unmodified silica gel column by elution with oxalic acid containing crown ethers, 505

Flow analysis of micro amounts of chromium(III) and (VI) in natural water by solid phase spectrophotometry using diphenylcarbazide, 787

Development of a sensitive nitrate-selective electrode for on-site use in fresh waters, 877

Use of gold as a routine and long term preservative for mercury in potable water, as determined by ICP-MS, 1233

Total cyanide determination by a segmented flow injection-on-line UV digestion-amperometric method, 1255

A sampling device for collection and analysis of volatile halocarbons in coastal and oceanic waters, 1389

Field evaluation of a novel nitrate sensitive electrode in drainage waters from agricultural grassland, 1467

A transparent membrane filter for the solid-phase spectrophotometric determination of trace cationic surfactant in water, 1489

Identification of non-target compounds using gas chromatography with simultaneous atomic emission and mass spectrometric detection (GC-AED/MS): analysis of municipal wastewater, 1547

Redoxspeciation of selenium in water samples by cathodic stripping voltammetry using an automated flow system, 1803

Synthesis of 2-hydroxy-3-carboxyl-5-sulfonicarsenazo and its application to the spectrophotometric determination of thorium, 1839

WAVELENGTH SELECTION

Wavelength selection by net analyte signals calculated with multivariate factor-based hybrid linear analysis (HLA). A theoretical and experimental comparison with partial least-squares (PLS), 725

WIND TUNNEL

Laser photoacoustic spectrometry and its application for simulation of air pollution in a wind tunnel, 1205

WINE

Simultaneous determination of *cis*- and *trans*-resveratrol in wines by capillary zone electrophoresis, 61

An automated flow-injection titrator for spectrophotometric determinations of total acidity in wines, using a single standard solution and gradient calibration, 1727

A sulfite biosensor fabricated using electrodeposited polytyramine: application to wine analysis, 1775

X-RAY DIFFRACTION

Photoacoustic thermal characterization of kaolinite clays, 1209

X-RAY PHOTOELECTRON SPECTROSCOPY

XPS characterization of nanosized overoxidized polypyrrole films on graphite electrodes, 1215

ZINC

Flow injection on-line preconcentration and flame atomic absorption spectrometric determination of iron, cobalt, nickel, manganese and zinc in sea-water, 191

Determination of Cu, Fe, Mn, and Zn in blood fractions by SEC-HPLC-ICP-AES coupling, 657

Electrothermal atomic absorption spectrometric determination of lead, cadmium, copper and zinc in high-salt content samples after simultaneous separation on polyethylene powder impregnated with 1-(2-pyridylazo)-2-naphthol: application to the analysis of hemodialysis fluids, 1345

0003-2654(1999)124*;1-1
